Key findings of the report:

- The COVID-19 outbreak had a positive impact on the ambulance services market. The market expanded as a result of the rising demand for ambulance services to provide emergency care to COVID-19 patients during the pandemic.
- The majority of major manufacturers have concentrated on numerous strategies to combat the COVID-19 pandemic due to severe health emergency. For example, during the pandemic crisis in June 2020, Mahindra announced the debut of the BS-6 Supro ambulance. Such initiatives by the key market players boosted the market growth.

The report also discusses the market dynamics, including drivers, restraints, and opportunities, and provides a detailed analysis of the market structure.

The research provides detailed segmentation of the global ambulance services market based on, mode of transportation, service type, operating type, and region. The report discusses segments and their sub-segments in detail with the help of tables and figures. Market players and investors can strategize according to the highest revenue-generating and fastest-growing segments mentioned in the report.

Based on mode of transportation, the ground ambulance segment held the highest share in 2021, accounting for around three-fifths of the global ambulance services market, and is expected to maintain its lead in terms of revenue during the forecast period. However, the air ambulance segment is expected to register the highest CAGR of 9.5% from 2022 to 2031. The report also discusses the water ambulance segment.

Based on service type, the emergency medical transport segment accounted for the highest share in 2021, holding more than half of the global ambulance services market, and is expected to continue its leadership status during the forecast period. Also, the same segment is estimated to grow at the highest CAGR of 9.1% during the forecast period. The report also analyzes the non-emergency segment.

Based on operating type, the government segment held the highest share in 2021, accounting for more than two-fifths of the global ambulance services market, and is expected to rule the

roost during forecast period. On the other hand, the private segment is estimated to grow at the highest CAGR of 9.2% from 2022 to 2031. The report also analyzes the public private partnership and others segment.

Based on region, North America held the largest share in 2021, contributing to nearly two-fifths of the global ambulance services market share, and is expected to maintain its lead in terms of revenue during the forecast period. However, the Asia-Pacific region is expected to manifest the fastest CAGR of 9.5% during the forecast period.
