The global seafood packaging market can be broadly segmented in terms of type of product, material, packaging technology, application, type of seafood, and region. In terms of type of product, the market is further segmented into shrink films, jars, boxes, food cans, bags & pouches, trays, and others. Of these segments, pouches & bags are expected to witness a promising growth in the near future. With the advent of multilayered pouches & bags, they help in improving the shelf life of highly perishable products such as scallops and fish.
