Increase in focus on product innovations and surge in emphasis on tampons made of organic and biodegradable materials are the factors expected to fuel the growth of the period care market in Australia. The reusable period care products have gained traction in the past few years. There are many people who cannot afford the costs of buying menstruation care products regularly.

As per the Australia period care market forecast, by distribution channel, the pure play online

segment is expected to grow at a significant rate during the forecast period. This is attributed to the rise in adoption of smartphones and increase in penetration of internet. Therefore, washable and reusable period care products is gaining immense traction and it also helps in reducing the menstrual care wastes management. In addition, rise in environmental concerns regarding the disposable wastes of period care products fosters the growth of the reusable period care products across Australia. The outbreak of the COVID-19 brought a temporary disruption in the Australia period care market. The production of the period care products hampered and this created a gap between demand and supply. This resulted in a price hike of the period care products.

The adoption of reusable menstruation care products is on an increase owing to the rise in emphasis on the sustainable products. Most of the disposable period care products are made using plastic, which is non-biodegradable and they harm the environment. Disposable sanitary pads are one of the highest waste generators in Australia.
