

# RNA-Based Therapeutics Market by Cardiovascular, Kidney diseases, Oncology, Infectious diseases, Metabolic disorders 2030

Asia-Pacific RNA-based therapeutics market report includes extensive coverage of drivers, restraints, and opportunities.

PORTLAND, OREGON, UNITED STATES, September 26, 2023 / EINPresswire.com/ -- RNA-based therapeutics involves broad range of the RNA-based technologies, which help the patients to diagnose or treat various chronic diseases. The RNA-based therapeutics play a crucial role in providing the accurate and precise healthcare treatments, which helps in

treating the disease at molecular and sub-molecular levels. RNA-based therapeutic modalities provide beneficial business opportunities due to its rising acceptance, technological advancements and targeted drug delivery of these therapeutics as compared to the other treatment modalities (synthetic therapeutics). The <a href="Asia-Pacific RNA-based therapeutics market">Asia-Pacific RNA-based therapeutics market</a> is growing at a promising CAGR due to the gene silencing potential of these therapeutics. However, the market is still at the nascent stage in developing regions such as India and witnessing the lucrative growth rate during the analysis period.

The Asia-Pacific RNA-based therapeutics market is segmented on the basis of technology, application, end user and geography. Based on technology, the market is segmented into

enabling technologies, enabled technologies and RNA antisense technologies. Owing to the applications, the market is segmented into cardiovascular diseases, kidney diseases, oncology infectious diseases and metabolic disorders. Based on the end users, the market is categorized into diagnostic, therapeutic and research organizations. Geographically, the market is segmented into China, Japan, India, Australia and others. Emerging economies such as India, China, Singapore and Malaysia are the potential geographies for market expansion due to improving healthcare standards. These economies have a large presence of domestic manufacturers of RNA-based therapeutics, which contribute to an increase in the market competition for multinational giants by adopting the strategy of price penetration.

# BY TECHNOLOGY:

**Enabling technologies** 

Microarrays

Labelling

Purification

Linear amplification

**QRT-PCR** 

Inhibition

**Enabled technologies** 

RNA Interference (RNAi) technologies

Small interfering RNA (siRNA)

MicroRNA (miRNA)

RNA antisense technologies

# **BY APPLICATIONS:**

Cardiovascular

Kidney diseases

Oncology

Infectious diseases

Metabolic disorders

Others

### 

Powered with Complimentary Analyst Hours and Expert Interviews with Each Report

Comprehensive quantitative and qualitative insights at segment and sub-segment level

Covid 19 impact trends and perspective

Granular insights at global/regional/country level

Deep-rooted insights on market dynamics (drivers, restraints, opportunities) and business environment

Blanket coverage on competitive landscape

Winning imperatives

Exhaustive coverage on 'Strategic Developments' registered by leading players of the market

AMR introduces its online premium subscription-based library Avenue, designed specifically to offer cost-effective, one-stop solution for enterprises, investors, and universities. With Avenue, subscribers can avail an entire repository of reports on more than 2,000 niche industries and more than 12,000 company profiles. Moreover, users can get an online access to quantitative and qualitative data in PDF and Excel formats along with analyst support, customization, and updated versions of reports.
