

# USA Vein Clinics Offer Free Webinar on "Why Varicose Veins Are So Visible"

NORTHBROOK, IL, UNITED STATES,  
September 28, 2023 /

EINPresswire.com/ -- [USA Vein Clinics](#) announced today it is releasing another free on-demand webinar, ["Why Are My Veins So Visible: Fact and Fiction About Vein Disease,"](#) to help the public learn about vein disease. The webinar is presented by Jacob White, M.D., Medical Director at USA Clinics Group, who uses before and after photos to illustrate symptoms and risk factors associated with vein disease.

The webinar is one of two that USA Vein Clinics have released during Pain Awareness Month in September. The first webinar, "A Guide to Vein Disease" by Dr. Aaron Shiloh, can also be viewed on-demand on the USA Vein Clinics' website.

“

Minimally invasive vein treatments today are safe, highly effective, and a huge improvement over traditional vein surgery. People no longer have to suffer in pain with uncomfortable symptoms.”  
*Yan Katsnelson, M.D. Founder and CEO, USA Vein Clinics.*

“Vein disease affects more than 25 million people in the U.S., with pain being one of the most obvious symptoms,” said Yan Katsnelson, M.D. Founder and CEO, USA Vein Clinics. “Minimally invasive vein treatments today are safe, highly effective, and a huge improvement over traditional vein surgery. People need to know they do not have to suffer in pain with uncomfortable symptoms.”

Symptoms of vein disease include enlarged, swollen, knotted clusters of purple veins; swelling,

aching or a sensation of heaviness in the legs; itching skin above the affected veins; skin discoloration; and ulcers. Varicose veins are more than a cosmetic problem; they can often leak excess blood into the surrounding tissue, leading to venous ulcers, deep vein thrombosis (DVT), and other serious problems.

The “Why Are My Veins So Visible” webinar will cover:

- Why do veins become visible?
- Misconceptions around vein disease and varicose veins
- Symptoms and risk factors of vein disease
- Available treatments for vein disease
