EINPresswire.com/ -- According to a new report published by Allied Market Research, titled, "[Electric Toothbrush Market](#)" by Bristle, Head Movement, and End User: Global Opportunity

Analysis and Industry Forecast, 2022-2031," the global electric toothbrush market size was valued at \$3,070.8 million in 2020, and is projected to reach \$6,549.1 million by 2031, growing at a CAGR of 8.1% from 2022 to 2031. The adult electric toothbrush accounted for more than 76% of the global electric toothbrush market in 2020. The electric toothbrush is a type of toothbrush that cleans teeth using quick and automated bristle motions. [Brushing teeth](#) by hand might harm gums and enamel. The electric toothbrush has a pressure sensor that stops users from brushing too aggressively, which is considered to be harmful. Thus, consumers have started to adopt electric toothbrush as an oral care product on a large scale.

Electric toothbrush has witnessed increase in popularity in the recent decade, due to rise in awareness towards oral hygiene among people and increase in oral complications globally. Moreover, electric toothbrush helps in effective removal of plaque and calculus from the oral cavity as compared to the manual toothbrush, thereby reducing oral problems such as gum diseases and tooth decay. In addition, the use of soft bristles in electric toothbrush helps in fighting tooth sensitivity. FOREO created ISSA, a unique electric toothbrush made of non-irritating silicon bristles, which reduce the pain caused by brushing in sensitive areas of oral cavity.

According to electric toothbrush market analysis, the electric toothbrush market is segmented on the basis of bristle, head movement, end user, and region.

On the basis of bristle, the global electric toothbrush market is divided into soft bristles and nanometer bristles.

The soft bristles segment is a major contributor to global electric toothbrush market, and is anticipated to be the most lucrative segment during the forecast period, as it offers several oral benefits such as prevention of plaque formation & dental caries and is better suited for sensitive teeth.

In 2020, North America and Europe collectively accounted for more than 76% of the global electric toothbrush industry, in terms of value, owing to increase in popularity of the electric toothbrush and high disposable income in this region. Asia-Pacific is projected to grow at the highest rate, followed by LAMEA, owing to rise in oral health awareness.

One of the most significant market prospects for increase in the electric toothbrush market share is a surge in [oral hygiene awareness](#) among young people. The advanced applications of the electric toothbrush such as gum massaging and teeth whitening are likely to drive the electric toothbrush market demand in the coming years. The adoption and integration of innovative technologies is expected to open up new avenues for global electric toothbrush market expansion.

The requirement to replace the head of electric toothbrushes every three to six months is a possible major hurdle to the market's expansion. The cost of replacing the head is likely to deter people from using electric toothbrushes. On the other hand, the electric toothbrush market growth is expected to accelerate due to the change in global market dynamics and technological advancements. These electric toothbrush market trends drive the market growth.

A large number of major firms are concentrating their efforts on the dynamic markets of North America and Europe. Furthermore, most parts of the world are seeing an increase in the use of technology assessment as a development strategy. The electric toothbrushes are being enthusiastically adopted by the local people in such places, providing an opportunity for major market players.
