Nonwoven fabrics refer to a fabric-like material comprised of staples and long fibers that have been chemically, mechanically, thermally, or solvent-bonded together. Nonwoven fabrics are used in the manufacture of disposable and durable clothing, garment linings, shoe linings,

interlinings, and synthetic leather fabrics. They provide specific functions such as absorbency, liquid repellency, resilience, stretch, softness, strength, flame retardancy, washability, cushioning, filtering, sterility, and others.
