U.S. is expected to dominate the global [fifth party logistics market share](#) in 2025, the growing e-commerce industry in United States support the fifth party logistics market due to the rising demand of efficient supply chain by manufacturing companies, as well as 3PL and 4PL companies. With the growth of the e-commerce sector in the U.S., start-ups related to on-demand and cloud-based warehousing, such as Stord, Flexe, and FlowSpace, are gaining popularity. These companies are also being awarded long-term projects by their customers and some companies also offer fulfillment services. For instance, in December 2020, Flexe, an on-demand warehousing and technology platform used by retailers, such as Walmart, has raised \$70 million in funding to make logistics networks more elastic in the U.S.

The prominent factors that drive the growth of the fifth party logistics market share include rise in the global trade and increasing efficiency of supply chain. Moreover, technological advancement and introduction of blockchain is expected to propel the growth of the fifth party logistics market. The countries such as China, India, and Brazil are growing economies. Thus, the demand for end to end supply chain network management is witnessing prominent growth in these countries, which is expected to provide lucrative opportunities for the growth of the fifth party logistics market in the region.

The market of the fifth party logistics is closely associated with the logistic activities across the globe. The COVID-19 crisis is causing uncertainty in the logistic market by delaying supply chains, hampering business growth and generating uncertain demand scenarios.

By type, the fifth party market is segregated into transportation, warehousing and other services. The transportation segment accounted for the highest revenue in 2025, as companies are continuously fifth party logistics solutions for supply chain optimization and minimizing the transportation cost.

COVID-19 Impact Analysis

The COVID impact on the logistics market is unpredictable and it is expected to remain in force till the second quarter of 2021.

The COVID-19 outbreak forced governments across the globe to implement strict lockdowns and made social distancing mandatory to contain the spread of the virus. This led to a sudden downfall in global trade, which further reduced the demand for logistics across the world. Moreover, the nationwide lockdown forced the logistics service providers to partially or completely shut their operations which resulted in delays in the supply chain activities. Rise in pharmaceutical and e-commerce sales owing to the pandemic has increased the demand for the logistics market.
