Definition

CBG oil, or Cannabigerol oil, is a product derived from the hemp plant that contains high

concentrations of Cannabigerol (CBG), one of the many cannabinoids found in cannabis. CBG is often referred to as the "mother cannabinoid" because it serves as a precursor to other cannabinoids, including THC (tetrahydrocannabinol) and CBD (cannabidiol). CBG oil is similar to CBD oil in that it does not produce the psychoactive effects associated with THC and is commonly used for its potential therapeutic benefits.
