COVID-19 Scenario:

□ The pandemic accelerated the adoption of zero-touch provisioning solutions as businesses started recognizing the benefits of automation and digital transformation. Scalability, flexibility, and affordability are the key factors that make zero-touch provisioning solutions attractive to businesses.

□ Also, due to the shift toward remote work, zero-touch provisioning tools became essential for protecting remote devices and networks. In a nutshell, the pandemic increased the demand for user-friendly zero-touch provisioning solutions. Companies were looking for solutions that are easy to deploy and manage and do not require highly specialized technical knowledge.

By component, the platforms segment held the largest share in 2022, garnering nearly three-fourths of the global zero-touch provisioning market revenue, and is projected to maintain its dominance by 2032. The services segment, on the other hand, would showcase the fastest CAGR

of 15.3% during the forecast period.

By device type, the switches segment captured the largest share of nearly one-third of the global zero-touch provisioning market revenue, and is expected to dominate the market during the forecast period. However, the IoT devices segment would display the fastest CAGR of 18.6% from 2023 to 2032. The routers, access points, firewalls, and others segments are also studied in the report.

By network complexity, the complex network architecture segment held the major share in 2022, contributing to more than half of the global zero-touch provisioning market revenue and is projected to rule the roost by 2032. However, the dynamic network environment segment is expected to witness the fastest CAGR of 17.2% from 2023 to 2032. The multi-vendor environment segment is also analyzed in the report.

By industry vertical, the IT and telecom segment held the largest share in 2022, accounting for nearly one-third of the global zero-touch provisioning market revenue. On the other hand, the healthcare segment is projected to maintain its dominance in terms of revenue during the forecast period. Simultaneously, the same segment would also exhibit the fastest CAGR of 17.7% throughout the forecast period. The segments assessed through the study include BFSI, manufacturing, retail, and others.
