

DaVinci Smiles – Dental Implants Perth Offers Free Smile Makeover Consultations

Yokine, Australia – DaVinci Smiles – Dental Implants Perth, a dentist in Joondalup, Australia, that offers a wide selection of high-quality dental treatments is thrilled to announce it is now offering free smile makeover consultations for patients considering dental implants.

The complimentary phone dental implant consultation is designed to be an easy and accessible way for patients who have questions about the treatment, such as the Cost of Dental Implants in Perth and the different types of dental implants available.

DaVinci Smiles – Dental Implants Perth spokesperson said, “At DaVinci Smiles, we’re committed to making dental care accessible and convenient for everyone. That’s why we’re proud to offer phone consultations with our expert consultant, Tina. With just a phone call, you can get answers to your dental implant questions, discuss your concerns, and learn more about the services we offer.”

During the free smile makeover consultation, an appointment with a DaVinci Smiles – Dental Implants Perth dentist will be booked for patients where their dental health history will be reviewed, a dental evaluation will be performed, and teeth impressions, as well as X-rays, will be undertaken. These steps are vital to determine if dental implants can be a suitable treatment option for the patient.

The dentist at DaVinci Smiles – Dental Implants Perth will then discuss all the necessary information and available treatment options for the patient before developing a personalised plan. The comprehensive treatment plan will detail the steps of the procedure, the timeline and the costs, along with the possible risks associated with dental implants.

Dental implants have become increasingly popular and are a great option for people seeking cost-efficient, quality dental restoration. They offer a strong and reliable alternative option for Missing Teeth. Dental implants are artificial replacements for the tooth root and are usually made up of surgical-grade titanium screws. Hence, this revolutionary treatment provides a durable and secure foundation for false teeth. They offer the advantages of preserving a patient’s facial appearance and giving them the freedom to smile, speak, and confidently live their life.

DaVinci Smiles – Dental Implants Perth offers a selection of different dental implant types for patients, including:

Single Implants

Single dental implant costs vary depending on factors such as the type of implant chosen, the materials used, and the cost of the restoration work. However, most single-tooth implants can range from \$4,000 to \$6,000. Additional costs may be required if patients need a bone graft before fitting the implant.

Multiple Implants

Multiple dental implants are often suitable treatment options for patients missing multiple original teeth or having large gaps between their existing teeth. This type of treatment involves placing several implants at once depending on the implant patient's health and dental needs, which can range from \$10,000 to \$30,000 depending on the number of implants required and the complexity of the procedure involved. This procedure is often chosen by people who have lost several teeth due to health issues or accidents.

All-On-4 Dental Implants

All-on-four dental implants are an advanced technique that involves placing four strategically placed titanium posts into a patient's jaw bone to support a full arch dental prosthesis. The average price for this minimally invasive treatment at DaVinci Smiles – Dental Implants Perth starts from \$25,000. This includes the X-ray, dental surgery, implant abutment placement, and crown fabrication. This is a popular option for those looking for a more permanent replacement for their missing teeth.

About DaVinci Smiles – Dental Implants Perth

DaVinci Smiles is a trusted dental clinic in Joondalup that offers a wide range of dental implant services. The dedicated dentists use the latest advanced technology available to provide good-quality dental implants. These are screw-like devices designed to replace tooth roots. They can hold dental prosthetics or artificial teeth, which act as a new set of teeth. DaVinci Smiles focuses on handling patients with poorly fitted dentures, badly damaged teeth, or missing teeth. The dental team at the clinic understands that replacing teeth is significant to one's oral health. Hence, DaVinci Smiles continues to stay informed about the innovations in implant dentistry, keeps up-to-date with the new techniques and uses them during each procedure to deliver long-lasting dental restorations.
