Technological and infrastructural challenges associated with the flying car development and high costs associated with the development of flying cars system and supporting technology are the crucial factors that are expected to impact the growth of the flying car market during the forecast period.

Europe is expected to hold the dominating position in the global market owing to increase in product development activities by the regional players such as Klein Vision S. R. O. and AeroMobil, In addition, increase in funds by governments and investors for business development propels the growth of the segment. Commercial & professional commute segment is expected to hold dominating position in 2025, owing to the increase in initiatives of

commercial service providers such as Uber. Uber is entering into partnership with market players for the development of the commercial flying car solution, however, personal commute segment is anticipated to witness leading growth over the forecast period. Proactive government initiatives toward the development of flying car and advancements in flying car technologies are expected to supplement the flying car market, thereby providing a lucrative opportunity for the expansion of the flying car market industry during the forecast period.
