

# Soap Free Procyon® Spot & Stain Remover Recertified by Green Seal®

*Plus Manufacturing, Inc. announces that its Soap Free Procyon® Spot & Stain Remover has once again been awarded the esteemed Green Seal® Certification.*

SPOKANE, WA, UNITED STATES, October 3, 2023 /EINPresswire.com/ -- Plus Manufacturing, Inc., the pioneering force behind the acclaimed [Soap Free](#) Procyon brand, is proud to announce that its Soap Free Procyon® Spot & Stain Remover has once again been awarded the esteemed [Green Seal®](#) Certification. This recognition highlights the company's unwavering commitment to producing environmentally friendly and high-quality cleaning products.

The Green Seal Certification stands as a testament to the product's compliance with the rigorous standards outlined in "GS-37 Edition 7.8 Cleaning Products for Industrial and Institutional Use." This means that consumers can trust that the Soap Free Procyon Spot & Stain Remover not only cleans effectively but does so with a reduced impact on the environment and human health.

"We could not be more excited to have our Spot & Stain Remover recognized again by Green Seal®," said Jonathan Pearlstein, vice president at Plus Manufacturing. "Their certification shows our customers that we are fully committed to making products that are sustainable and perform well."

Originally certified by Green Seal® in 2008, this renewal showcases Plus Manufacturing, Inc.'s dedication to sustainability and its long history as an environmental leader in the cleaning industry. By carrying the Green Seal Certification Mark, Soap Free Procyon's Spot & Stain

Remover continues to set the standard for eco-friendly cleaning products.

"As people become more aware of how their purchases impact the environment, certifications like Green Seal are extremely important," added Pearlstein. "We are honored to provide a certified product that surpasses the highest standards."

In addition to its Green Seal certification, Soap Free Procyon® Spot & Stain Remover contains no hazardous chemicals that are harmful to health or the environment. The product is free of per- and polyfluoroalkyl substances (PFAS), known as forever chemicals due to their persistence in the environment. Soap Free Procyon also contains no volatile organic compounds (VOCs), which can lower indoor air quality and pose health risks over time.

"We are dedicated to pursuing third-party certifications and strict internal standards that remove concerning chemicals from our formulas," continued Pearlstein. "Consumers can trust Soap Free Procyon® to deliver superior cleaning without the toxic tradeoffs found in some traditional cleaners."
