Telecare Devices Market Definition:

Telecare devices are pretty nifty. They're designed to support people in their homes, especially those who might need extra assistance due to health issues or aging. These

devices use technology to keep an eye on individuals and provide timely help when needed.

For example, you've got things like medical alert systems that are often worn as pendants or bracelets. If someone takes a tumble or has an emergency, they can press a button to summon

help. Then there are smart home sensors that can monitor things like movement, temperature, or even whether someone has taken their medication.
