The Steinberg Law Group has decades of proven experience and the resources to help victims of asbestos exposure and their families obtain the financial compensation they deserve. All of it.

The Steinberg Law Group has decades of experience in handling mesothelioma and other asbestos-related cases. With offices in New York, California and Texas, the Steinberg Law Group has a national footprint that helps win the best possible financial compensation for clients.

www.mesotheliomaoptions.com

Typically, asbestos exposure will have occurred sometime between the 1950s and the 1980s. Some of the most prevalent professions that encountered large quantities of asbestos include power plant workers, maritime workers, industrial workers, plumbers, pipefitters, electricians, mechanics, machinists, miners, railroad workers and construction workers, to name a few. Since the latency period for mesothelioma patients is approximately 40 years, most people diagnosed with mesothelioma or asbestos-related lung cancer in 2023 were exposed decades ago.

www.mesotheliomaoptions.com

Michigan has 9 known naturally-occurring asbestos deposits. Michigan is also the birthplace of the American automobile industry. As a result, thousands of citizens of the state were exposed to asbestos during the 20th century, which helps explain Michigan's above-average mesothelioma death rate. Michiganders who worked in the steel & shipbuilding industries, power plants and oil refineries are also at an elevated risk of developing asbestos-related lung cancer or mesothelioma. www.mesotheliomaoptions.com

Known jobsites, companies and locations with asbestos exposure in Michigan include, but are not limited to, Moores Park Power Station, J.H. Campbell Generating Station, Nazareth Academy Powerhouse, Holland City Powerhouse, Erie Steam Plant, Delray Power Plant, Detroit Power Plant, Coldwater Powerhouse, Mistersky Gas Power Plant, Connors Creek Power Plant, Boyne City Advance Steam Plant, Bridgeman Nuclear Plant, Donald C.
