A hydraulic breaker, also known as a hydraulic hammer, is a heavy-duty construction attachment used for breaking or demolishing hard materials such as concrete, rocks, asphalt, and pavement. It is commonly used in construction, mining, quarrying, and demolition applications. The hydraulic breaker is typically attached to an excavator or a skid-steer loader through a hydraulic system. It uses hydraulic power to deliver repetitive, high-impact blows to the surface being worked on, breaking it into smaller pieces. Hydraulic breakers come in various sizes and designs to suit different applications.
