

# Flower Turbines' Charging Stations Tested as Durable and Safe

*Flower Turbines' Charging Stations have withstood hurricanes in both the Netherlands and Texas.*

LUBBOCK, TEXAS, UNITED STATES, October 12, 2023 /EINPresswire.com/ -- [Flower Turbines'](#) wind/solar off-grid Charging Stations have withstood hurricanes in both the Netherlands and Texas. If you are going to put a wind turbine on the street, you want to be very sure it's durable and safe.

The turbine has been tested at 200 kilometers per hour (120 mph) wind with no mechanical problems. It also starts below 4 kilometers per hour (2 mph) whereas most turbines start at about 9. That combination indicates the quality of the aerodynamics and design.

The Charging Station is used to generate energy off-grid with wind, solar, and a battery to charge small mobility and electronic devices. They are quiet, bird-friendly, safe, and durable.

Here is truck testing of Flower Turbines: small-sized turbines (used in our charging station): <https://vimeo.com/819559089> and medium-sized turbines: <https://vimeo.com/836593410?share=c>
