High Maltose Syrups Market Share, Size, Price, Growth, Trends, Outlook, Research Report and Forecast 2024-2032

30 NORTH GOULD STREET, WYOMING,
UNITED STATES, October 11, 2023
/EINPresswire.com/ -- High Maltose
Syrups Market Outlook

According to a new report by Expert Market Research titled, "[High Maltose Syrups Market Growth](#)", Share, Size, Analysis, Report and Forecast 2024-2032", the global high maltose syrups

market is being aided by the rising demand for high maltose syrups in China, which reached 3.81 million tons in 2023. Aided by multifunctional properties of high maltose syrups and increased consumption of baked products and confectionery, the market is projected to witness a further growth during the forecast period of 2024-2032.

High maltose syrup, extracted primarily from starch, predominantly maize or rice, is emerging as a preferred choice in various food and beverage applications. Characterised by its mild sweetness, lower hygroscopicity, and ability to resist crystallisation, this syrup has found a significant role in confectionery products, brewing, and processed foods. Its relatively stable nature under high temperatures and acidic conditions makes it particularly suitable for candies and frozen desserts.

The escalating demand for natural sweeteners is pivotal in boosting the global high maltose syrups market size. As consumers become increasingly health-conscious, the trend of eliminating high fructose corn syrup (HFCS) and sugar from diets is gaining momentum. High maltose syrup, being a natural alternative, is witnessing heightened demand, especially in regions where clean label products are trending.

Additionally, the global inclination towards fitness and well-being is fuelling the consumption of energy drinks and energy bars where high maltose syrup, with its rapid yet sustained energy-releasing property, is a crucial ingredient. The athletic community, in particular, is turning towards such products for enhanced performance and quicker recovery.

The versatility of the syrup leads to its increased applications across various sectors, contributing to the high maltose syrups market demand. In the pharmaceutical domain, it is valued for its non-crystallising nature, finding its way into syrups and oral medicinal suspensions. The brewing industry too, finds it invaluable due to its fermentable sugars which enhance the beer's flavour and mouthfeel without compromising its shelf life.

Based on the high maltose syrups market analysis, leading industry players are delving into intensive R&D. The objective is to refine the production process, enhance the nutritional profile, and potentially discover new applications for high maltose syrup. Collaborative efforts, both within the industry and with academic institutions, are expected to uncover innovations and streamline the supply chain.

The global market for high maltose syrups is primed for robust growth, supported by changing consumer preferences and the product's versatile nature. As the global palette evolves, there's a discernible move towards Asian cuisine, which often employs high maltose syrup in traditional dishes and sauces. This culinary shift is likely to favour the high maltose syrups market growth in the coming years.

High Maltose Syrups Market Segmentation

The market can be divided based on source, concentration, end use, and region.

Market Breakup by Source

- Natural
 - Corn
 - Sweet Potatoes
 - Waxy Barley
 - Rice Starch
 - Others
- Chemical
 - β-amylase

Fungal α -amylase

Market Breakup by Concentration

High Concentrated

Very High Concentrated

Market Breakup by End Use

Beverages

Brewing Industry

Food

Confectionery

Others

Market Breakup by Region

North America

Europe

Asia Pacific

Latin America

Middle East and Africa

Competitive Landscape

The EMR report looks into the market shares, plant turnarounds, capacities, investments, and acquisitions and mergers, among other major developments, of the global high maltose syrups companies. Some of the major players explored in the report by Expert Market Research are as follows:

Cargill, Incorporated

Meelunie B.V.

Nectafresh Agro Foods

Austrade Inc.

Others
