19.6% and may see market size of USD 11682.11 Million by 2029, currently pegged at USD 3971.26 Million.”

Definition:

Banking-as-a-Service (BaaS) is a business model and a set of financial services provided by traditional banks, fintech companies, or other financial institutions that allow non-banking entities to access and offer banking and financial products and services through APIs (Application Programming Interfaces). BaaS enables these non-banking entities, such as tech companies, startups, or businesses from various industries, to integrate banking and financial functionalities into their applications, platforms, or services, often without the need to become a fully licensed bank themselves. BaaS providers offer a range of financial services, including account creation, payments processing, fund transfers, lending, risk assessment, compliance, and more, which can be accessed and integrated into third-party applications via APIs. BaaS providers often offer white-label solutions, allowing third-party companies to rebrand and customize these financial services to align with their brand and user experience.

## Major Highlights of the Banking-as-a-Service Market Report Released by HTF MI

Europe Banking-as-a-Service Market Breakdown by Application (Government, Banks, Financial Institutions) by Type (Cloud-Based, API Based) by Banking Type (Web Banking, Mobile Banking) by Service (Digital Banking and Cards, Lending, Payments) and by Geography (Germany, France, Italy, United Kingdom, Benelux, Nordics, Rest of Europe)
