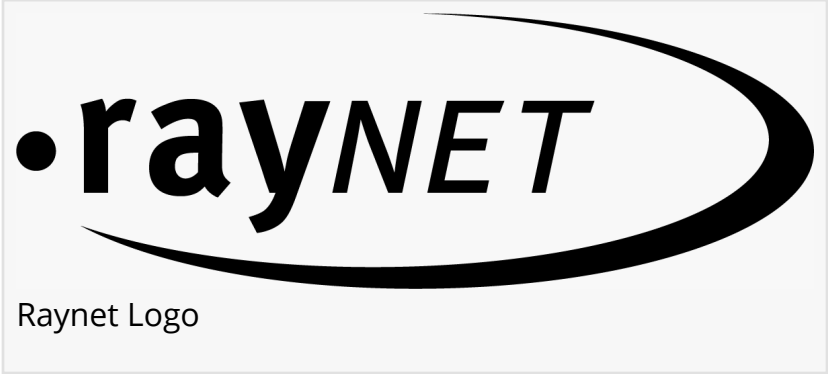
Raynet recognized in the 2023 Gartner® Market Guide for Unified Endpoint Management Tools

CHICAGO, ILLINOIS, UNITED , October 11, 2023 /EINPresswire.com/ -- Raynet, global software vendor with market-leading solutions and managed service provider in the field of Enterprise Software Management, is proud to announce its inclusion as a Representative Vendor in the Gartner® 2023 Market Guide for Unified Endpoint Management Tools.



Raynet Logo

The 2023 Gartner Market Guide for Unified Endpoint Management Tools report provides an overview of Unified Endpoint Management tools, as well as a comparison of different solutions, product scope, and price information, giving potential buyers a better understanding of the market. The report does not claim to be comprehensive and inclusion in the report is not an endorsement.

> We're proud to be one of the vendors that are recognized in the Gartner Market Guide report...our technologies can manage the truth breadth and complexity of enterprise environments. "
>
> *Ragip Aydin, CEO of Raynet*

Among its key findings, the report warns, "Single-operating-system (OS)-centric endpoint management platforms (as opposed to multi-OS platforms) fragment operation, which increases cybersecurity risks, inflates overall costs, requires specialized skills and creates an inconsistent digital employee experience (DEX)."

Raynet's Unified Endpoint Management (UEM) solution provides support for a wide variety of the most popular operating systems, including Windows, macOS, Linux, UNIX, Android, iOS, as well as many others. Raynet's UEM solution has been designed to support endpoint management across large, complex, and heterogeneous environments, so users can streamline and automate their processes. The solution also supports third-party patch management through its integration to the Raynet Package Store, allowing it to manage the full range of devices and software products in a modern business environment. Not only does this approach improve

organizational efficiencies, but it also supports rapid and automated vulnerability management, significantly increasing infrastructure security.

Raynet's UEM solution also offers flexible deployment options, on-premises, in private clouds, as an IaaS instance, or as a turnkey SaaS solution, and its flexible pricing and services mean that the solution is scalable to fit almost any midsized or enterprise environment. Its fully automated, end-to-end processes allow organizations to take a hands-off approach to endpoint management and focus on its business priorities.

Ragip Aydin, CEO of Raynet

"We're proud to be one of the vendors that are recognized in the Gartner Market Guide report. We have made significant developments this year to ensure that our technologies can manage the truth breadth and complexity of enterprise environments and to provide the automation required for genuine state-of-the-art vulnerability management and patching. So, we're especially excited to be listed in this year's report."

Ragip Aydin, CEO of Raynet
