Castle Dental is now Center Valley Dental

Dental implants have revolutionized the field of dentistry, providing a permanent solution to replace missing teeth. These implants, which are surgically placed into the jawbone, can also act as a sturdy foundation for crowns, bridges, or dentures. Made of titanium, these screws are biocompatible and fuse with the jawbone over time, ensuring stability and a natural feel.

“

Dental implants in the Lehigh Valley have seen a surge in demand due to their durability and natural appearance.”

Dr. Matthew Lang

Dr. Matthew Lang, dentist at Center Valley Dental, commented, "[Dental implants in the Lehigh Valley](#) have seen a surge in demand due to their durability and natural

appearance. Our team is trained in the latest implant techniques, ensuring that our patients receive the best care possible.”

In addition to single tooth replacements, Center Valley Dental also specializes in full-arch implants, a solution for those who no longer have teeth. Unlike traditional dentures, which can be uncomfortable and unstable, full-arch implants offer a fixed solution that feels and functions like natural teeth.

Center Valley Dental's services go beyond dental implants. They offer a comprehensive range of services, including [cosmetic dentistry](#), orthodontics, and [general dental care](#), ensuring that every patient's needs are met. To schedule an appointment, visit
