Liquid soaps have witnessed higher rate of adoption in North America and Europe. However, low

availability has been observed for these products in some major parts of Asia-Pacific and LAMEA, which is attributable to low performing macro-economic factors such as internet penetration and aggressive marketing strategies by manufacturers. Thus, lower penetration of such products limits growth of the liquid soap market.

For the purpose of liquid soap market analysis, the market is segmented by product into hand wash, face wash, surface cleaner and other (beard wash, body wash, and dish wash). The face wash segment accounted for a larger share of around 36.76% of the overall market in 2019. This segment is further expected to capture a larger liquid soap market share in 2027, owing to increase in demand for liquid soaps. This segment is anticipated to witness faster growth in developed economies, and is expected to account for 36.63% of the overall market by 2027.

On the basis of type, the market is segregated into organic and conventional segment. The conventional segment is expected to account for 63.26% of the overall market revenue by 2027.

On the basis of application, the market is segregated into residential and commercial segment. The residential segment is expected to account for 63.3% of the overall market revenue by 2027.

On the basis of distribution channel, the market is segregated into hypermarket/supermarket, convenience store, specialty store and online sales channel. The hypermarket/ supermarket segment is expected to account for 40.59% of the overall market revenue by 2027.
