

# Alternative Utility Services Commits to Sustainability and Environmental Protection Through E-Waste Recycling

DELAVAN, WISCONSIN, UNITED STATES,  
October 12, 2023 /EINPresswire.com/ --

Alternative Utility Services (AUS) is committed to creating a sustainable future for our planet, one that ensures social justice and equity. To that end, AUS has taken a leadership role in promoting environmental protection and sustainability through the recycling of their own e-waste.

E-waste, or electronic waste, is a growing problem in the world today. It often contains hazardous materials and valuable resources, underscoring the importance of appropriate disposal and resource reclamation. The University of California, Irvine recently published a [study](#) which shows that greenhouse gas emissions from electronic waste increased by 53% between 2014 and 2020.

[AUS recently recycled](#) 188 pounds of electronic waste, diverting 5.41 pounds of toxic materials from landfills and reducing 262.05 pounds of greenhouse gas emissions. This certified destruction of e-waste also ensures AUS maintains high data integrity standards to protect our clients.

"We are proud to be a leader in sustainability and environmental protection," said AUS Director of Corporate Affairs, Jenna Buehre. "We believe that by investing in energy-saving technologies, businesses can reduce their carbon emissions and improve their ESG score."

By responsibly recycling e-waste, businesses can substantially mitigate their ecological impact and align with the "E" in ESG.

## [About Alternative Utility Services, Inc.](#)
