

Painless, Gentle Laser Filings Available From The Gilbert Dentist

Fear of pain is the main reason why people don't go to the dentist. Advanced gentle laser filings are a painless way to get the dental care we all need.

GILBERT, AZ, USA, October 12, 2023 /EINPresswire.com/ -- Fear of pain is the number one reason people are anxious about going to the dentist. Yet, proper dental health is a crucial aspect of our overall well-being.

Fortunately, technological advances continue to enhance how we maintain our oral hygiene. One such innovation making waves in dentistry is laser filings.

This cutting-edge technique revolutionizes dental care by providing patients with a less invasive and more comfortable experience.

Traditional dental fillings often involve drills and other mechanical instruments, which can be intimidating for many patients. The sound and sensation of the drill can cause anxiety and discomfort, leading some individuals to avoid essential dental treatments.

This is where gentle laser filings come into play, offering a more patient-friendly alternative.

Dr. Robert J. Brown, aka "[The Gilbert Dentist](https://www.thegilbertdentist.com)," in Gilbert, Arizona, who uses laser and other advanced technologies, cites three key advantages of laser filings:

Gentle Laser Filings

painless laser dentistry from The Gilbert Dentist

1. No anesthesia is needed.
2. Procedures are fast and painless.
3. Patients leave, ready to eat and drink normally as if nothing had happened.

Instead of using a traditional drill, dentists utilize a specialized laser that precisely removes decayed or damaged tooth material. This laser is remarkably gentle, causing the patient little to no discomfort or pain.

Furthermore, the laser's precision allows for more conservative filings, meaning that less healthy tooth structure needs to be removed during the process. This preserves more of the natural tooth, which is always the preferred option in dental care.

In addition to their gentleness, laser filings also have other noteworthy benefits. They tend to be faster than traditional filings, reducing patients' time in the dental chair. The laser sterilizes the treated area, minimizing the risk of infection, and cauterizes blood vessels, reducing bleeding during the procedure.

Gentle laser filings offer patients a more comfortable and less intimidating dental experience.
