

Flntegrate Partners with CSI to Bolster Fraud Prevention and Data Integration

BIRMINGHAM, ALABAMA, UNITED STATES, October 12, 2023 /EINPresswire.com/ -- Flntegrate Technology, a leading fintech provider, announced today a new strategic partnership with CSI to revolutionize fraud prevention and data integration within the financial sector through CSI's WatchDOG® Fraud and WatchDOG® AML solutions. CSI will leverage Flntegrate's middleware API expertise to streamline data integration and expedite onboarding processes, expanding its existing partnership with Flntegrate for data conversion, migrations and dispute management that has spanned nearly 18 years.

Traditionally, financial institutions face challenges in conducting internal data conversion or integrations, leading to potential time constraints and hindering fraud prevention efforts. Flntegrate's partnership with CSI enables financial institutions to implement real-time, cuttingedge tools that are both intuitive and powerful.

"Data gathering and conversion play pivotal roles in ensuring the quality of the AI modeling needed to fight financial crime," said Allison Maddock, chief product officer at CSI. "Flntegrate's years of expertise in serving CSI and our customers will expedite the data access and integration processes."

By leveraging Flntegrate's Integration Manager™ alongside CSI's WatchDOG® products, fraudulent transactions can be detected earlier and more reliably, significantly strengthening fraud prevention measures.

Kris Bishop, CEO of Flntegrate, emphasized the significance of this partnership by stating, "We have worked with the CSI team and their customers for nearly twenty years and are excited to be an integral part of their success in helping financial institutions fight financial crimes. This is a real game-changing partnership of companies and technology to fight fraud, improve the dispute management process and better serve clients."
