

A Breakthrough Solution for Sun Damage Mitigation and Accelerated Wound Healing

OreVital Labs Unveils GHK-CU Dermal Renewal Topical KPV Peptide

MIAMI, FL, USA, October 15, 2023 /EINPresswire.com/ -- Harnessing the ground-breaking cancer prevention and skin healing benefits of Copper Peptide, KPV Peptide, Nicotinic Acid, and Creatine, OreVital Labs is the first in the peptide-biohacking field to combine these revolutionary peptides in a single magnesium-infused transdermal application--Dermal Renewal Peptide.

By stimulating the body's natural repair mechanisms, these peptide amino acids work as a comprehensive strategy for wound healing, reversal of sun damage, and cancer prevention with the desirable side effects of enhancing the overall health and appearance of the skin.

“

Key to prevention; Science, nutrition, and a healthy lifestyle significantly reduce cancer risk.”

Murad Sweiss

By stacking these powerful peptides, [Copper Tri-Peptide](#) GHK-CU (comprising Glycine, Histidine, and Lysine), KPV Tri-Peptide (Lysine-proline-valine), Nicotinic Acid ([Nia-24](#)) and Creatine, an array of benefits is revealed (<https://www.mdpi.com/2079-9284/5/2/29>). Harnessing anti-inflammatory, antimicrobial, and antioxidant properties, these peptides are known for effectively

reducing inflammation, eliminating bacteria, and promoting tissue remodeling to minimize scar tissue. With added Nicotinic Acid (Niacin Vitamin B3) the combination shows promise to further reverse sun damage and, in some cases, even reverse skin cancer.

Copper Tripeptide serves as a powerful antioxidant safeguarding cells from oxidative damage, a key factor in cancer development. Moreover, copper peptides play a crucial role in accelerating

Revitalize & Restore Your Skin

Dermal Renewal Peptide
Lysine-Proline-Valine-Creatine with Niacin Vitamin B3

- Reduces inflammation & kills bacteria.
- Reduces scar tissue.
- Stimulates the body's natural repair mechanisms.
- Reverses sun damage & skin damage.
- Reduces skin diseases like acne, rosacea, eczema, psoriasis, hyper-pigmentation & scars.

wound healing and burn recovery. [KPV Tripeptide](#), a naturally occurring tripeptide, showcases its remarkable ability to alleviate inflammatory responses, a central feature in cancer progression. Nicotinic acid contributes to cellular health and metabolism, while Creatine bolsters energy pathways. The incorporation of magnesium for transdermal delivery amplifies the overall effectiveness of this preventive regimen.

The synergistic effect of these active ingredients makes Dermal Renewal Peptide a viable and practical solution for various skin conditions, including acne, rosacea, eczema, psoriasis, hyperpigmentation, stretch marks, and scars.

OreVital Dermal Renewal Anti-Inflammatory Topical Cream harnesses advanced technology to deeply deliver potent peptides and nourishing elements into body tissues. It has gained popularity in the spa community along with holistic medical practices, dermatologists, and oncologists recognizing its preventive skincare benefits and anti-aging advantages. The enthusiastic reviews from spa professionals who've integrated OreVital into their skincare routines highlight its remarkable success in a wide array of treatments and providing much-needed relief from inflammatory conditions.

About OreVital Labs: OreVital Labs is a pioneer in transdermal mineral skin supplements, dedicated to developing cutting-edge Transdermal Products for optimal health and wellness. Their mission is to harness the power of essential minerals, peptides, and natural ingredients to
