

## By 2032, The Aircraft Cargo Container Market envisions Share, Rising Trends, New Technologies & Growing Opportunities

Aircraft Cargo Container Market by Container Type, Material Type, Deck Type and Application: Global Opportunity Analysis and Industry Forecast, 2020–2027

NEW CASTLE, DELAWARE, UNITED STATES, October 16, 2023 /EINPresswire.com/ -- Aircraft cargo container is called unit load device, used to load luggage, freight and mail on wide-body and specific narrow body aircraft. It allows for a large amount of cargo to be bundled into a single air cargo container, allowing efficient and

secure transportation. Aircraft cargo container allows for tremendous savings in ground crews time and effort, preventing delayed flights.

Increase in use of standardized unit load devices is anticipated to fuel the growth of the global <u>aircraft cargo container market</u> in the years to follow. In addition, surge in cargo traffic due to rise in e-commerce, pharmaceutical, and electronic industries and development of lightweight and more durable containers are some of the major factors that boost the aircraft cargo container market growth. However, the fluctuating cost of cargo containers further hampers the growth of the global aircraft cargo container market. On the other hand, rise in innovation in cargo containers to develop new lightweight container is expected to offer lucrative growth opportunity to the market during the forecast period.

The global aircraft cargo container market is segmented into container type, material type, deck type, application, end user, and region. By container type, the market is classified into 88-inch pallet, 96-inch pallet, half pallet, 16 FT pallet, 20 FT pallet, AQ6, AQ7, M-6, LD-26, LD-29, LD-1,

insulated LD-3, and others. By material type, it is categorized into composite container, metal container, and other containers. On the basis of deck type, the global aircraft cargo container market bifurcated into lower deck cargo and main deck cargo. By application, the market is divided into passenger aircraft and military aircraft. By region, it is studied across North America, Europe, Asia-Pacific, and LAMEA.
