# Royal 4 Systems to Showcase WISE Tire and Wheel Management Software at SEMA 2023

Royal 4 Systems will be exhibiting its leading-edge WISE Tire and Wheel Management Software in booth 45291

LONG BEACH, CALIFORNIA, UNITED STATES OF AMERICA, October 19, 2023 /EINPresswire.com/ -- Royal 4 Systems, a global provider of leading warehouse management solutions for tire and wheel distributors, is pleased to announce their participation in SEMA 2023, the premier automotive specialty products trade event, from October 31

WISE Tire Software and Wheel Industry Solutions

to November 3, 2023, at the Las Vegas convention center. Royal 4 Systems will be exhibiting its leading-edge WISE Tire and Wheel Management Software in booth 45291. Royal 4 Systems has been a continuous exhibitor at the SEMA convention for the past 20 years.

WISE Tire and Wheel warehouse management software has been developed from years of experience working with major tire manufacturers and dealers. Royal 4 has collaborated with renowned names in the industry, such as TOYO Tires, Colony Tire, Tires Warehouse, American Tire, S&S Tire, and many others. WISE WMS solutions meet and exceed the needs of tire and wheel distributors everywhere.

Key features of WISE Tire and Wheel Software solutions include:

• Demand Forecasting and Planning: Businesses can leverage forecasting and planning capabilities to optimize inventory management, minimize stockouts, and maximize customer satisfaction.

• Tire Aging Alerts: WISE Tire Software includes tire aging alerts developed in collaboration with Toyo Tires. These alerts ensure that your picker pulls the oldest tires in your inventory first.

• NAFTA Compliance: With the WISE system, tire distributors can ensure NAFTA compliance when selling tires to other countries. The software captures country of origin data, allowing

businesses to direct pickers to "made in USA" tire stock for orders to these countries if required.

• Tire and Wheel-Specific Barcodes: WISE generates custom tire and wheel-specific barcode labels for any items where the original barcodes are missing or damaged, ensuring accurate inventory tracking.

• Aliases: Distributors can scan a manufacturer's barcode, which cross-references an internal table of your own SKU's, allowing you to putaway the items (and pick them) with your own internal SKU.

By visiting booth 45291, attendees will witness how our innovative software can enhance their warehouse operations, improve efficiency, and ensure compliance with industry regulations.

WISE Tire and Wheel Software integrates seamlessly with major Tire Dealer POS systems such as ASA, TireGuru, TCS, MAM, MaddenCo, and others, and ERP systems like SAP, Oracle, JD Edwards, Lawson, NAV, Dynamics, SAGE, and more. This interoperability allows tire distributors to achieve end-to-end management of their warehouses with a complete tire distribution solution.
Visit Royal 4 Systems at booth 45291 during the SEMA Show 2023 to learn more about the benefits of the WISE system. The WISE team will be available to answer any questions.

About Royal 4 Systems:
Royal 4 Systems is a leading provider of innovative warehouse management solutions. Entering our 40th year in business, Royal 4 Systems offers leading software products that optimize warehouse operations, enhance supply chain visibility and streamline business processes. Royal 4 System's Tire and Wheel Management Software is trusted by businesses worldwide to drive operational excellence and achieve significant productivity gains.
