Forwardly's new Automatic Payment feature simplifies the payment collection process for clients and vendors. Once authorized, upon the generation of an invoice using a user's integrated accounting software, Forwardly takes the reins—immediately dispatching the invoice to the payer and ensuring the collection of payment on or before the set due date. This seamless synchronization with users' accounting tools transforms the entire accounts receivable

process.

"Forwardly's payment processing service has truly impressed me with its lightning-fast processing times and exceptional customer support. They understand the importance of efficiency and reliability when it comes to financial transactions," said Catherine Pabón, Owner of Odyssey Bookkeeping. "With the added benefit of the ability to manage payments on behalf of my clients from a single dashboard, Forwardly saves me both time and effort and makes it a must-have for my business to simplify my payment processes while ensuring a seamless experience for my clients."

Forwardly users can set up Automatic Payments for free and relish in the confidence of never

missing out on a payment. This not only guarantees sustained cash flow but also strengthens business ties through prompt and reliable payments. Additional benefits include:
