Veterinary Endoscopes Market: Key Findings

- The prevalence of gastrointestinal parasitism infections is being increasing among both livestock and companion animals that cause pain, diarrhea, oedema and death in severe cases. As per the 2017 All-island Animal Disease Surveillance report, various digestive tract diseases including inflammation of the intestine and scour account for over 40% of all cattle deaths. Hence, increase in the cases of gastrointestinal diseases globally is fueling the business avenues in the veterinary endoscopes market, note analysts at TMR.

- Over the period of past few years, there has been a surge in the pet population suffering from gastrointestinal issues. Moreover, the owners of such pets are inclining toward adopting advanced diagnosis and endoscopies surgeries at veterinary clinic and hospitals. Hence, there has been a surge in the number of endoscopy surgeries globally. This factor, in turn, is creating lucrative opportunities in the global veterinary endoscopes market.
