The dermatome devices market was valued at ~US\$ 138 Mn in 2018 and is projected to expand at a high CAGR from 2019 to 2027. Rise in the number of patients with chronic burn injuries, chronic ulcers, trauma, and cancer across the world is anticipated to fuel the growth of the dermatome devices market.

Dermatome is a surgical medical device primarily used to produce thin and uniform slices of skin from a donor for use in different plastic and reconstructive surgical procedures. Dermatomes are available in different operating modes, such as knife dermatomes are operated manually, while powered dermatomes are either electric or battery operated. The other types of dermatomes are air dermatomes and drum dermatomes.

Dermatome Devices Market: Key Driving Factors

Growing clinical potential of dermatome devices in skin reconstructive surgeries for various categories of patients is a key trend shaping the prospects of the dermatome devices market. Substantial uptake of dermatome devices in procedures for chronic wounds healing is a key drive for worldwide demand. A few statistics support the trend.

• According to the Wound Healing Society, about 15% of older adults in the U.S. suffer from chronic wounds.

• According to a research funded by the Korea government, the global prevalence of diabetic foot varies from 3% (Oceania) to 13% (North America); the global average is 6.4%

• Substantial numbers of cosmetic surgeries has spurred the demand for dermatome devices. According to the International Society of Aesthetic and Plastic Surgeons (ISAPS), around 23 million of them were performed in 2013 (the statistics holds good for 95 member countries).

Prominent Market Players of Dermatome Devices Market:

• Companies, such as Integra Life Sciences Holdings Corporation, Zimmer Biomet Holdings, Inc., and B. Braun Melsungen AG accounted for major share of the global dermatome devices market in 2018. Other global players in the market include

- o Humeca BV
- o De Soutter Medical
- o Aygun Co., Inc.
- o Nouvag AG
- o Richard Wolf GmbH
- o Surtex Instruments Limited.

• These players are focused on adopting organic and inorganic growth strategies to strengthen product portfolio. These companies have adopted strategies such as expansion of geographical footprint, investment in research & development, product differentiation. Dermatome Devices Market: Regional Profile

• North America is a prominent regional market and is likely to gain shares in the dermatome devices market by the end of the forecast period. Currently, the prominent share that the region holds can be attributed to the presence of robust healthcare facilities in skin reconstructive patients. A major chunk of demands in the region comes from the U.S. and Canada, where medical device makers have been unveiling novel technologies

• Latin America and the Middle East and Africa are expected to be remarkably prominent markets. A large growth prospect come from Brazil and Mexico, fueled particularly by medical tourism.

Dermatome Devices Market Research Methodologies and Approaches

The report on the Dermatome Devices Market is prepared by employing well-validated research methodologies and approaches. The study authors have applied industry-validated tools for collection of data, including interviews, observations, surveys, questionnaire, and secondary research. The adoption of robust approaches for quantitative research measures makes the study offer holistic perspectives and unique.

The global dermatome devices market is segmented on the basis of:

Туре

- Drum Dermatome
- Air Dermatome
- Knife Dermatome
- Powered Dermatome
- o Electric Dermatome
- o Battery Operated Dermatome

End User

- Hospitals
- Ambulatory Surgery Centers
- Specialty Clinics

Region

- North America
- Europe
- Asia Pacific
- Latin America
- Middle East & Africa
