Factors such as increase in defense spending to improve government effectiveness, rise in concerns toward cyber warfare and national security, and rise in requirement of increasing levels of protection due to persistent threat are some of the major factors that drive growth of the cyber warfare market. However, lack of cyber warfare professionals hinder growth of this market. Furthermore, ongoing regulatory reforms by governments of several countries to ensure cyber defense posture along with rapid economic growth in developing countries is opportunistic for the cyber warfare market.

Lack of expertise associated with cyber security acts as a restrain for this cyber warfare market. As cyber security expertise for proactive strategic planning is very less compared to what is

required for growth of an organization. In addition, lack of expertise in interoperability with existing information systems are quit hard to change.
