Recent Development of Video Telemedicine market:

According to the study published in Neurology Journal, in April 2017, video telemedicine is expected to become a new tool to improve care for people suffering from Parkinson's disease and essentially for those patients who do not have easy access to a neurologist. Moreover, the study finding shows that video telemedicine for chronic disease such as Parkinson's disease is more effective than in-patient care. In addition, the broader adaptation of technology has a potential to expand the access to patient-centered care facilities.
