Serum Free Media Global Market Report 2023 –
Market Size, Trends, And Global Forecast 2023-2032

Innovative Product Offerings Paving the Way for Market Evolution

“

The serum-free media
market is expected to reach
\$2.23 billion in 2027 at a
CAGR of 11.3%.”

*The Business Research
Company*

An emerging trend in the serum free media for cell culture market is the focus on product innovation by key market players. Thermo Fisher Scientific Inc. introduced Gibco CTS OpTmizer Pro Serum-Free Media (SFM) in March 2021, revolutionizing the market with a groundbreaking media solution catering to the metabolism of healthy donor cells, particularly suited for the development of allogeneic cell therapies.

Growing Prevalence of Chronic Diseases Propelling Market Expansion

Expected to reach \$2.23 billion in 2027, the [serum-free media market](#) is forecasted to grow at a CAGR of 11.3%. The escalating prevalence of chronic diseases is a significant driver for the serum-free media market. Serum-free media enables researchers to optimize conditions for specific cell types, facilitating growth under favorable circumstances. By facilitating the development of new therapies and treatments, serum-free media aids in the research and production of cell types for chronic diseases. Projections by the National Center for Biotechnology Information (NCBI) suggest a substantial increase in the number of individuals aged 50 years and older with at least one chronic illness, anticipated to rise by 99.5% by the year 2050, from 71.522 million in 2020 to 142.66 million.
