

Experience Sound Reimagined: Introducing the RMS One by Concierge Audio

The RMS One Reference Music System, introduced by the luxury audio brand Concierge Audio, is a new revolution in wireless audio.

LOS ANGELES, CALIFORNIA, UNITED STATES, October 24, 2023 /EINPresswire.com/ -- In the realm of wireless audio, there are advances, and then there are revolutions. The RMS One Reference Music System, introduced by the luxury audio brand [Concierge Audio](#), belongs to the latter category. "The RMS One is to audio what HD color was to black and white television. It's a game-changer," remarks Ric Kimbell, Co-Founder of Concierge Audio.

After spending more than three years in meticulous research, Concierge Audio has crafted a wireless sound system that effortlessly delivers crisp, high-resolution playback from any native music app or popular streaming service. The RMS One is not just a speaker; it's an orchestra in your living room, making every note, beat, and subtlety tangible.

Embedded within each RMS One speaker is an integrated System Electronics Module, a testament to state-of-the-art engineering. With a powerful 600W spread across three amplifiers, it flawlessly drives six 6.5-inch rear-firing, low-distortion woofers, and a magnesium dual coincident concentric driver. This ensures an in-room frequency response ranging from a deep 25Hz to a sharp 20kHz, with only a +/- 3dB deviation.

“

The RMS One is to audio what HD color was to black and white television. It's a game-changer”

*Ric Kimbell, Co-Founder of
Concierge Audio*

The speaker's aesthetics match its sound in grandeur. Thanks to the FlexFinish™ exterior panel system, owners can personalize their RMS One's look from an expansive

array of finishes and even update it as their tastes change.

Concierge Audio upholds a belief that to truly appreciate the RMS One's capabilities, one must experience it in their unique space. Thus, each potential customer is offered an exclusive home demonstration by handpicked Authorized [Concierge Agents](#).

Specifications:

Type: Three-way, fully active speaker system

Bass: Six 6.5" rear-firing, long-throw, low distortion drivers

Mid and Highs: 6.5" magnesium midrange and 1.0" magnesium Coincident Coaxial driver

Frequency Response: Typical 25Hz – 20kHz, +/- 3dB
