

SyncSim Introduces Virtual Simulation Center for Schools of Nursing

"Simulation-as-a-Service" format provides synchronous, instructor-led, learning scenarios.

Tackles clinical capacity limits and cultivates clinical judgement.

“

SyncSim was born from a sincere desire to provide nursing and other healthcare students with safe spaces to truly participate, fail, reconsider, try again, and eventually earn an epic win.”

Dr. Leila Casteel, Co-founder and CEO of SyncSim, LLC

NASHVILLE, TENNESSEE, UNITED STATES, October 24, 2023 /EINPresswire.com/ -- [SyncSim](#), LLC announces the launch of its Virtual Simulation Center ahead of the 2023 Academic Nursing Leadership Conference in Washington D.C. later this week. SyncSim’s “Simulation-as-a-Service” format provides a straight-forward way for Schools of Nursing to select, order and enroll their students into live experiential education simulations, facilitated by credentialed nursing instructors, utilizing a variety of virtual healthcare environments with standardized patient actors across 36 initial learning events.

“SyncSim was born from a sincere desire to provide

nursing and other healthcare students with safe spaces to truly participate, fail, reconsider, try again, and eventually earn an epic win. Real life, clinical experiences should not be where we take a risk” said Dr. Leila Casteel, Co-founder and CEO of SyncSim, LLC. “That’s why we developed the SyncSim Virtual Simulation Center – to create a convenient way for school administrators to add critical experiential learning topics to their curriculum, while also increasing the depth of participation to the student experience.”

The SyncSim news comes as the nation faces demands of a prolonged nursing shortage that the approximate 2600+ universities and colleges offering Nursing programs are challenged to meet. While Schools of Nursing collectively seek to increase enrollment levels and reduce the number of qualified student applicants who are turned away, they are partially limited by the capacity constraints for required clinical rotations within healthcare providers facilities.

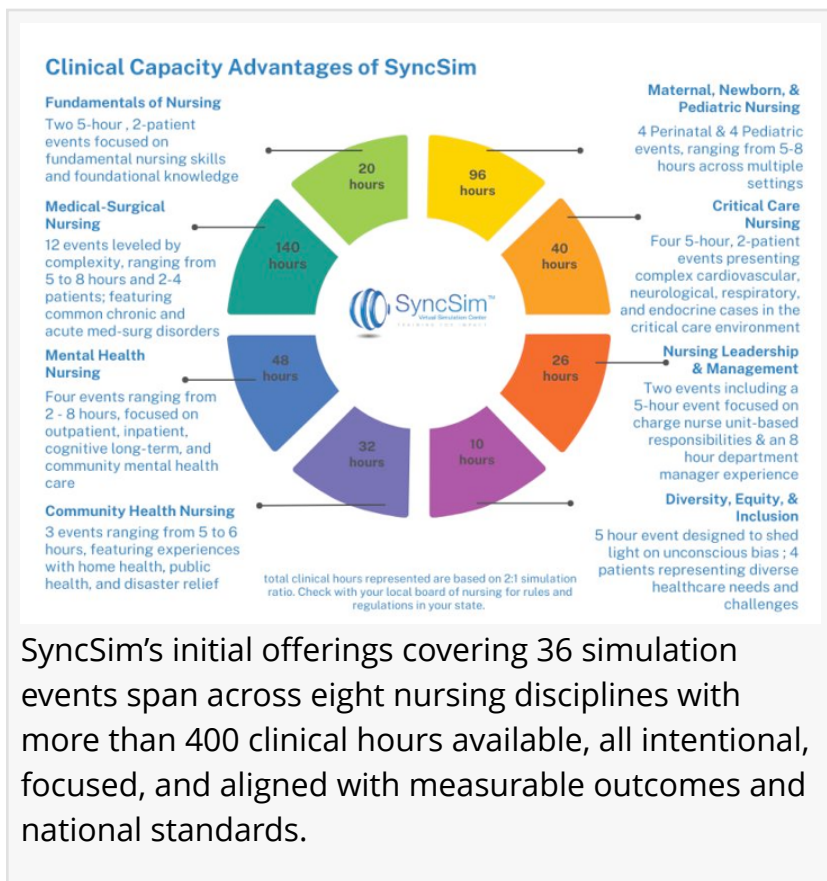

SyncSim’s initial offerings covering 36 simulation events span across eight nursing disciplines with more than 400 clinical hours available, all intentional, focused, and aligned with measurable outcomes and national standards.

“It is evident that many long hours were put into making this a robust activity for the students” said Kim Clarke, MSN, RN-BC, CHSE, and part of the Wake Tech CC Nursing Simulation & Lab, who accompanied her students in an early preview event on the platform. “We loved the cultural and diverse patient populations that we were able to care for, which provided much discussion, and loved the activities in-between caring for the patients.”

Nursing school Deans and Directors may connect in person with SyncSim leadership at the upcoming 2023 Academic Nursing Leadership Conference (ANLC) in Washington D.C., October 28-30, 2023. Additional information about the Virtual Simulation Center may be found on www.SyncSim.com.

SyncSim, LLC offers the first Virtual Simulation Center with an easy to administer “Simulation-as-a-Service” solution to the healthcare education industry. Imagined, created and operated by Healthcare Educators for Healthcare Education, SyncSim provides Schools of Nursing a quick, convenient way to increase their clinical capacity and the depth of student learning experiences.
