

South Korea Artificial Intelligence Market size worth \$19.9 billion by 2032

South Korea Artificial Intelligence Market size is predicted to experience tremendous growth in the near future.

PUNE, MAHARASHTRA, INDIA, October 23, 2023 /EINPresswire.com/ -- South Korea Artificial Intelligence Market size is predicted to experience tremendous growth in the near future. Our research indicates that the market was crossed over USD 2.07 Billion in 2022 and is projected to record more than 25.44% growth rate from 2023 - 2032, reaching a valuation of approximately USD 19.9 Billion by the end of the forecast period.

The COVID-19 pandemic has had a tremendous impact on the world, causing immense human suffering, economic damage, and significant changes to the health, social, and environmental sectors. According to WHO, as of December 31, 2020, over 82 million people have been infected and 1.8 million have died from the virus. Supply chain management has struggled with the sudden increase in demand for certain products and the restrictions on travel and production that have been in place since the pandemic began. Companies are trying to adapt to the new reality, and changes that will persist after the pandemic is over are likely to emerge.

Furthermore, the resilience challenge has been addressed in distinctly different ways by various industries. Healthcare providers stand out as resilience leaders, as 60% of healthcare respondents have regionalized their supply chains and 33% have relocated production closer to end markets.

Market Value Insights conducted a comprehensive [analysis of the South Korea Artificial Intelligence Market](#), utilizing a 360-degree approach that combines both primary and secondary research methods. This approach allowed us to gain a deep understanding of the current market conditions, including the supply-demand balance, pricing trends, customer preferences, and

other important factors.

Our primary research involved collecting insights from industry experts and opinion leaders from around the world, allowing us to validate our findings and gain a broader perspective of the market. To ensure the accuracy and reliability of our data, we employed various market estimation and data validation techniques and developed a proprietary model to forecast market growth until 2032. By using these research methods, we provide our clients with a comprehensive understanding of the South Korea Artificial Intelligence Market, allowing them to make informed business decisions and stay ahead of the competition.
