

# Utility Global CEO to Present at Asia Pacific Hydrogen Summit 2023

*Claus Nussgruber to provide insight related to offtake agreements in the APAC region and how they drive decarbonization of hard-to-abate sectors*

HOUSTON, TX, UNITED STATES, October 23, 2023 /EINPresswire.com/ -- [Utility Global](#), the only decarbonization technology company pioneering the eXERO™ technology platform optimized for hard-to-abate industry sectors, today announced the company will present at the upcoming Asia Pacific Hydrogen Summit 2023 in Sydney, Australia at the International Convention & Exhibition Centre. [Claus Nussgruber](#), chief executive officer for Utility Global, will contribute his perspective on a panel discussing “APAC Offtake Agreements Driving the Demand to Decarbonise Hard to Abate Sectors” at 1:35 PM on October 26, 2023.

In a world that's increasingly focused on sustainability, the challenge of decarbonizing hard-to-abate sectors cannot be understated. Mr. Nussgruber, with his leadership in industrial gas and clean energy solutions, will offer valuable insights into how we can drive low-carbon-intensity operations and accelerate the energy transition in these critical industries. The panel will also explore hydrogen projects decarbonising heavy industry in the region's steel, mining, cement, chemicals and agriculture; converting waste gas as a means to create sustainable hydrogen; and opportunities in power, storage and transportation.

“Industries like steel manufacturing, petrochemical and even mobility need to start developing

solid strategies now to decarbonize their operations,” stated Nussgruber. “Waste gas to hydrogen is one of the most cost-effective and least operationally disruptive strategies these industries can implement. Disruptive technologies working in sync with the circular economy is the easiest path forward to decarbonisation.”
