

BCS Concrete Structures Unveil Remarkable Transformation at UT Blanton Museum

*BCS and White Construction Company
Redefine Art at the Iconic UT Blanton
Museum*

AUSTIN, TEXAS, UNITED STATES, October 23, 2023 /EINPresswire.com/ -- In a collaborative effort, [BCS Concrete Structures](#) and White Construction Company have successfully completed a long awaited renovation and art installation project at the prestigious Blanton Museum, at The University of Texas campus in Austin.

Blanton Museum, an integral part of the University of Texas, is one of the leading museums of art and culture in the country. Housing a diverse collection of over 21,00 artworks, the museum serves as a hub for European, American, and Latin American art. With a mission to inspire and engage through visual art, the museum offers an array of traveling exhibitions, educational programs, and public events. The recent renovation project led by BCS and White Construction Company further elevates this cultural landmark as a major resource for the community of Austin.

Navigating the intricacies and challenges of a college campus project, the teams, led by Miguel Castro, BCS Superintendent, Leonel Perez, BCS General Superintendent,

and Paul Kaskie, WCC Superintendent, demonstrated exceptional skill throughout the project.

The construction project encompassed a sweeping civil revitalization, incorporating cast-in-place walls, pathways, bridges, stages, and decks. Interior enhancements extended to both the Smith and Michner buildings. With five distinct installations, the project demanded attention to detail, a challenge carefully executed by BCS Superintendent, Miguel Castro.

Collaboration was key, as BCS worked closely with the UT design team and three artists in a dynamic, ever-evolving [commercial concrete project](#). The result is a truly distinctive environment within UT Blanton, featuring architectural marvels like radius walls, a towering 20-foot-high rendition of flower petals, and an intricate lighting installation.

Visitors in Downtown Austin can come and see the finished project that was masterfully built by the remarkable teams of BCS, WWC, and UT.

About BCS Concrete Structures:

BCS Concrete Structures is the leading commercial concrete contractor known for its commitment to quality and safety in every [concrete construction project](#). They offer turnkey concrete solutions that have set industry standards in Central Texas and beyond. For more information, visit <https://bcsaustin.com/>.
