Managed Data Center Services Global Market Report
2023 – Market Size, Trends, And Global Forecast
2023-2032

Embracing Expansion Catering to Growing Data Demands

“

The global managed data center services market is expected to grow from \$317.39 billion in 2022 to \$366.52 billion in 2023 at a compound annual growth rate (CAGR) of 15.5%.”

*The Business Research
Company*

The [global managed data center services market](#), set to rise from \$366.52 billion in 2023 to a projected value of \$643.4 billion by 2027, exhibits a robust growth trajectory, despite the challenges posed by the Russia-Ukraine conflict and the lingering impact of the COVID-19 pandemic. The market's resiliency is underscored by the increasing adoption of data centers worldwide, signifying the indispensable role of managed data center services in the contemporary business landscape.

The managed data center services market's growth is primarily fueled by the surging number of data centers

globally. With data centers serving as pivotal repositories for managing a multitude of organizational functions, the need for comprehensive managed data center services continues to escalate. Notably, Korea and the United States have witnessed significant upsurges in their data center capacities, accentuating the expanding scope and significance of managed data center services worldwide.

Read our sample report on the global managed data center services market for a comprehensive

overview of the industry landscape and its driving factors:

Managed Data Center Services Market Key Players and Technological Advancements

Market leaders, including Microsoft Corporation, AT&T Inc., and IBM, are actively integrating advanced technologies to reinforce their market presence. The recent launch of Cisco Umbrella's Secure Access Service Edge (SASE) data centers demonstrates the sector's commitment to providing integrated security solutions for businesses of all scales.

Consolidating Industry Landscape through Strategic Acquisitions

Strategic acquisitions, exemplified by Blackstone Inc.'s acquisition of QTS Realty Trust Inc., illustrate the market's dynamic nature, reflecting an increased focus on bolstering digital infrastructure capabilities and catering to the escalating demands for data storage and management.

Geographical Insights and Market Segmentation

North America currently dominates the managed data center services market, with Asia-Pacific poised to witness significant growth in the coming years. The market's segmentation based on types, deployment types, enterprise sizes, and end-user industries highlights the industry's versatile solutions catering to a diverse range of business requirements globally.
