

Real Fyre Gas Logs and Bromic Platinum Smart-Heat Gas Heaters

Real Fyre Gas Logs & Bromic Platinum Heaters at Darden Building Materials.

LORENA, TEXAS, UNITED STATES, November 6, 2023 /EINPresswire.com/ -- [Darden Building Materials](#) proudly presents a new chapter of sophistication and comfort for both indoor and outdoor spaces with RH Peterson [Real Fyre Gas Logs](#) and Bromic Platinum Smart-Heat Gas Heaters. Elevating spaces to new heights of elegance and warmth, these exclusive offerings underscore the company's commitment to delivering the finest construction and building materials to its valued customers.

RH Peterson Real Fyre Gas Logs provide not only a cozy atmosphere but also a sense of radiating warmth that lingers long after the fire. These gas logs stand out for their intricate surface detailing and extended lifespan, ensuring a lasting investment. Their remarkable ability to withstand prolonged exposure to high heat without succumbing to oxidation means that they maintain their stunning original appearance.

Featuring a diverse selection of over 40 authentic styles, Real Fyre gas logs offer the perfect choice to enhance indoor spaces, including two

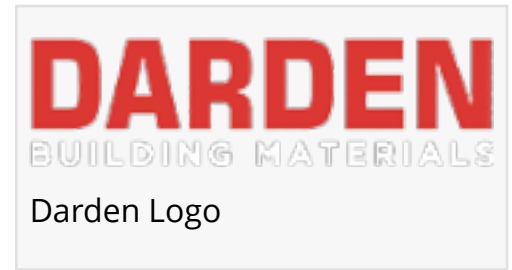

The Bromic Experience

Realfyre Logs

exceptional collections - Vent-Free and Contemporary Log Sets and Vented Gas Log Collection. The Real Fyre Vent-Free systems encompass a range of options to enhance fireplaces, such as the Charred Series - G10, known for its lively flames and a substantial ember bed that accentuates handcrafted logs. Another choice within this collection is the Evening Fyre Series - G18, sculpted and hand-painted to replicate the captivating ambiance of a wood fire with distinctive charring on the front log.

Additionally, the Contemporary Series - G21 introduces a sleek, modern appearance to fireplaces, while the Golden Oak Series - G9 features dancing flames and an ember bed with an innovative reflective panel enhancing the visual appeal of a fireplace. For those with smaller fireplaces, the Valley Oak Series - G8 offers a simple yet effective design, making it an ideal choice. Meanwhile, the Foothill Oak Series - G19A represents the latest in vent-free gas logs, designed to elevate hearths with style.

Darden Building Materials is offering RH Peterson Real Fyre Gas Logs and Bromic Platinum Smart-Heat Gas Heaters, infusing spaces with elegance and comforting warmth, ensuring quality and refined taste”

If a preference for traditional gas logs is the focus, the Vented Gas Log Collection offers the ideal choice. These hand-crafted and hand-painted logs offer an incredibly realistic appearance that remains beautiful even without a fire. This collection includes options like the G31 Three-Tiered Vented Gas Log System, producing high, full-bodied

flames while using fewer BTUs, ensuring both efficiency and visual appeal. Similarly, the G52 Radiant Fyre, an exclusive stainless steel booster grid, acts as a catalyst to intensify the fire and the glow of the logs.

Within the Specialty Sets, unique log sets are designed for tall fireplaces, and the Charred Series offers immersive log sets with a mature burned-through fire look, providing an authentic wood fire experience.

The Designer Series is an artistic collection that captures the realism, texture, and nuances of nature. In contrast, the Classic Series combines the beauty of a wood fire with the benefits of a gas fire, creating an inviting atmosphere.

If smaller wood-burning fireplaces or reduced gas usage is preferred, the Small Sets provide cozy warmth and comfort. Tailoring to specific fireplace types, the Large and See-Thru Sets are crafted to meet specific requirements, while the River Rocks include various smooth stone shapes, adding a unique, contemporary touch infused with the pristine charm of nature.

Not to be overlooked, the [Bromic Platinum 500](#) series gas heater is an excellent addition for

those seeking to add warmth and aesthetic appeal to their outdoor area. It is distinguished by a signature ceramic fascia in a sleek black finish, combining elegant design with industry-leading technology to swiftly project radiant heat deep into outdoor areas, encompassing up to 215ft². The soft red glow further enhances the ambiance.

Moreover, the Platinum Gas series has been engineered to successfully overcome winds of up to 12 mph. It also offers both natural gas and propane (LPG) options to cater to specific needs.

Darden Building Materials offers exceptional building materials and services, catering to the needs of residents in Waco, Temple, Belton, Killeen, and Central Texas. With over a century of experience, Darden Building Materials ensures top-quality service and excellent value for its customers. Their dedicated team has cultivated strong relationships with both customers and product manufacturers, solidifying their reputation as the go-to source for all building needs, including brick, stone, flooring, windows, doors, and fireplaces.
