

IDENTEC SOLUTIONS to Upgrade Asset Agent for Optimized Vehicle Production at Volkswagen Slovakia

Project expands existing Asset Agent software, streamlines vehicle tracking, and enhances process flow in indoor production and outdoor finished vehicle areas.

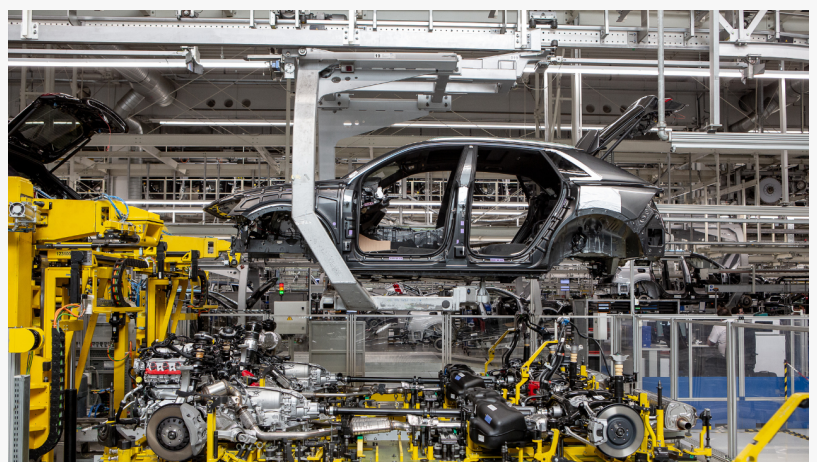

LUSTENAU, AUSTRIA, October 24, 2023 /EINPresswire.com/ -- Identec Solutions, a global leader in wireless sensor and localization solutions, is thrilled to announce a partnership agreement with Volkswagen Bratislava to upgrade their existing Asset Agent solution extensively.

"By streamlining and expanding the Asset Agent solution, we will elevate the effectiveness of vehicle tracking and location within Volkswagen Slovakia, plant Bratislava production facility," said Christian Aadal, Product Manager of Asset Agent at IDENTEC SOLUTIONS. "The upgrade commences immediately and will enhance the software's efficiency and broad-ranging localization capabilities. I'm thrilled to fortify our cooperation as Asset Agent is being a crucial and reliable part of production at Volkswagen Slovakia for more the ten years now."

Tomas Valicek, Project Manager at Volkswagen Slovakia, has expressed high hopes for the project, stating, "The extension of the Asset Agent's capabilities to our outdoor finished vehicle areas is a game-changer. It provides us with greater visibility and control, enabling a more

streamlined process flow that will drive significant productivity improvements."

The project will bring different technologies like [RTLS](#), GPS and active/passive RFID together working in harmony to make operational processes reaching optimal efficiency. With the seamless integration and utilizing its standard API's Asset Agent makes sure that the data is distributed to all relevant systems, and make sure that the users get the best possible experience from the value that is provided.

Asset Agent is already in use at Volkswagen's Wolfsburg plant ([car logistics](#)), where it has significantly improved efficiency in the finished vehicles area. It successfully optimized internal logistics and finishing processes, from fueling to tire changes, quality checks and storage, resulting in substantial time and cost savings.

With the upcoming project, Identec Solutions aims to replicate the success of Volkswagen Wolfsburg's implementation at the Bratislava plant, enhancing not only the efficiency of production but also contributing to the plant's ongoing efforts in continuous improvement.

The Volkswagen Slovakia plant in Bratislava is an integral part of the Volkswagen Group. Recognized for its state-of-the-art technology and the exceptional craftsmanship of its workforce, it has produced more than 7 million vehicles since 1991. The plant is a significant player in the automotive industry, thanks to its commitment to innovation, sustainability, and continuous improvement.

Asset Agent is a revolutionary solution designed to boost productivity in non-conveyor belt mass production processes. It simplifies the tracking and locating of assets in real-time within a production facility, eliminating manual inefficiencies. Through this robust technology, manufacturing facilities can increase productivity without significant infrastructure and workforce investments.
