PerfectScale Named in the 2023 Gartner® Cool Vendors™ for Container Management
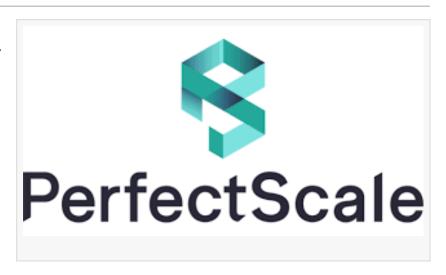

MORRISVILLE, NC, UNITED STATES, October 24, 2023 /EINPresswire.com/ -- PerfectScale, an innovation leader in Kubernetes optimization, is proud to announce that it has been recognized as a Cool Vendor in Container Management by Gartner, Inc.

"By 2027, more than 90% of G2000 organizations running containerized applications in hybrid deployments and leveraging container management tooling, up from fewer than 20% in 2023," stated Gartner in the "Cool Vendors in Container Management" report, "Gartner has seen an increase of more than 20% over the past year in client interactions involving container technology. Inquiries reveal that enterprises are not only adopting containers but also often struggling to manage the deployments. This is particularly so for deployments that span multiple public cloud environments and/or on-premises deployments."

Addressing this challenge, PerfectScale's Autonomous Optimization and Governance Platform provides what manual processes cannot, the ability to resolve Day 2 operational issues to take control of sprawling cloud costs. The intuitive solution ensures that anyone, from beginners to seasoned professionals, can easily optimize cloud/on-premise Kubernetes clusters to strike a balance between demand, performance, and cost. The company's automated Kubernetes scaler (PerfectScaler) eliminates manual resource/capacity management tasks with self-optimization and self-healing capabilities that adapt to system changes, while saving costs at every turn. As a result, DevOps, SRE, and Cloud Infrastructure teams are provided with new levels of visibility and authority over their Kubernetes environment while making it easier to deliver robust, always-on applications in the most cost-effective way possible.

"We are thrilled to be recognized by Gartner as a Cool Vendor," said Amir Banet, CEO and Co-founder of PerfectScale. "Our team is passionate about helping enterprises harness the full potential of their Kubernetes infrastructure. We believe that this acknowledgment fuels our mission to provide the intelligence needed to bring order to these often complex

environments."

About PerfectScale
PerfectScale's Kubernetes (K8s) Optimization and Automation platform makes it easy for DevOps, Platform Engineering, and SRE professionals to improve the stability and cost-effectiveness of their complete K8s environment. Our solution is the industry's only production-ready automation platform that can safely and autonomously right-size your environment to enhance resilience and availability, eliminate waste, and reduce carbon emissions. Ensure your environment is always perfectly scalable to meet demand by effortlessly optimizing every layer of your K8s stack.

PerfectScale is available in a free, no-commitment, 30-day trial. It takes only minutes to install and starts providing results instantly, all with a minimal footprint on your environment. Get started today at perfectscale.io!
