EINPresswire.com/ -- [The Beljanski Foundation](https://www.einpresswire.com/press-releases/the-beljanski-foundation-announces-winning-the-war-on-cancer), an esteemed cancer research nonprofit, announces that "Winning the War on Cancer" - The Beljanski Integrative Cancer Conference has been a resounding success, exceeding the expectations of all involved, including internal staff, attendees, speakers, sponsors, and exhibitors. With over 20 of the world's leading experts in integrative medicine, the conference saw an impressive turnout of 350 in-person attendees and an additional 100 people participating via the live stream. The Integrative Cancer Conference was a groundbreaking event that united top experts in integrative medicine to advance the understanding of cancer and explore novel approaches to treatment and prevention.

A significant highlight of the event was the successful fundraising efforts, which have allowed for the complete funding of the Breast Cancer Stem Cell Research Project. Dr. Qi Chen will conduct this pioneering research at the Kansas University Medical Center to advance the understanding of breast cancer stem cells and their potential vulnerabilities.
