

Military Aperture Antenna Market to See Huge Growth & Profitable Business

Military Aperture Antenna Market by Application , Frequency Band , and Platform : Global Opportunity Analysis and Industry Forecast, 2020-2027

NEW CASTLE, DELAWARE, UNITED STATES, October 26, 2023

/EINPresswire.com/ -- The global [military aperture antenna market](#) is experiencing a significant growth due to increasing demand for antennas with long-range capabilities for defense applications. Military antenna is a component of communication devices used in military aircrafts, naval vessels, unmanned aerial aircrafts, and armored vehicles, among others, which convert radio frequency fields into alternating current with the help of transducer and vice-versa. Aperture antennas constitute a large class of antennas, which emit EM waves through an opening (or aperture) and are commonly used at ultra-high frequency (UHF) and above where antenna sizes are relatively small. Antenna type & size can vary depending on the frequency used by antenna as well as system in that antenna is installed.

□□□□□□-□□ □□□□□□ □□□□□□□□□□:

Military antenna manufacturers are forced to shut down production operations due to government-imposed lockdown in the wake of COVID-19 pandemic.

Communication system manufacturers are facing operational issues due to supply chain disruption caused by the government initiatives to control the COVID-19 outbreak.

Military antenna developers have postponed the test & development of under-development military antenna in the absence of international technical workforce required for the job.

Governments have redirected all financial resources to fight the COVID-19 outbreak, hence procurement of military antennas will be delayed until situation neutralizes.

Global Military Aperture Antenna Market: Drivers, Restraints, Opportunities and Challenges
Report

Surge in military expenditure, increase in demand for defense satellite communication equipment, and rise in adoption of multifunctional radars are the factors that drive the global military aperture antenna market. However, high cost involved in the development hinders the market growth. On the contrary, advancements in drone technology and development of various antennas such as microstrip, metamaterial, and plasma antenna present new pathways in the industry.

Global Military Aperture Antenna Market: Recent Developments
Global Military Aperture Antenna Market: Recent Developments

Recently, in 2020, Comtech Telecommunication Corporation (satellite telecommunications company headquartered in New York, US) was awarded a 12.5 million USD order from US-based integrator Strategic Communications to provide very small aperture terminal (VSAT) satellite terminals to support secure communications for an unnamed US government end-user. Tempe (Comtech's Arizona-based subsidiary), Comtech EF Data Corporation (Comtech subsidiary specializing in communication equipment), also received a 1.7 million USD order for engineering services from Hughes Network Systems (high-speed satellite internet service provider headquartered in Maryland, US) to support its ongoing data link modernization (DLM) contract and provide new satellite communications systems for the US Army's MQ-1C Gray Eagle unmanned aircraft system (UAS). MQ-1C Gray Eagle is a medium-altitude, long-endurance unmanned aircraft system developed by General Atomics Aeronautical Systems for the US Army. Under the development and prototype phase of the sub-contract with Hughes, Comtech EF Data would provide advanced engineering services, including porting of waveforms to the prime contractor's airborne and ground-based satellite modems and support for stringent US Army cyber security requirements. Such demand for defense satellite communication equipment is expected to drive the global military aperture antenna market.

Global Military Aperture Antenna Market: Key Findings

- This study presents the analytical depiction of the global military aperture antenna industry along with the current trends and future estimations to determine the imminent investment pockets.
- The report presents information related to key drivers, restraints, and opportunities along with detailed analysis of the global military aperture antenna market share.
- The current market is quantitatively analyzed to highlight the global military aperture antenna market growth scenario.
- Porter's five forces analysis illustrates the potency of buyers & suppliers in the market.

- The report provides a detailed global military aperture antenna market analysis based on competitive intensity and how the competition will take shape in coming years.

- Which are the leading market players active in the military aperture antenna market?
- What are the current trends that will influence the market in the next few years?
- What are the driving factors, restraints, and opportunities in the market?
- What are the projections for the future that would help in taking further strategic steps?
