About Ferro

Ferro solves the "first mile" or "intake" problem for commercial insurance admins across the distribution channel. By offering an insured-centric and collaborative platform, we turn insured data to life for the benefit of the insured, broker, and insurer. Underwriting data acquisition is often forgotten in the industry buzz of "quote/bind/issue" solutions. With Ferro, the hassle of constantly "tracking down" insured information becomes a thing of the past. For more information, visit www.projectferro.com.
