Covid-19 Scenario:

□ The outbreak of the COVID-19 pandemic impacted the multichannel order management market negatively for quite some time. The shutdown affected the growth of the warehousing industry till the beginning of 2022. As the virus started spreading globally, ban on transportation was imposed by governments globally, causing a delay in the delivery of products. Warehouses were closed and distribution of supplies were delayed.

□ The recent boost in demand for multichannel order management is a consequence of the rise in e-commerce during the pandemic. To reach a large customers base and meet their expectations, businesses focused on several channels, which led to the receipt of orders from multiple channels.

□ Growth in many prime elements during the pandemic, such as the adoption of multiple sales channels by various companies, technological advancements in various industries, rise in smartphone penetration, growing internet users, and technological advancements in various industries contributed to the growth of the multichannel order management market.
