

Robo Advisory Market Drivers Shaping Future Growth, \$129.5 billion by 2032 | CAGR 32.5%

Robo advisory refers to the provision of automated, algorithm-driven financial advice and investment services.

WILMINGTON, DELAWARE, UNITED STATES, October 26, 2023

/EINPresswire.com/ -- Robo advisory services witnessed significant adoption in recent years, owing to the increase in penetration of smartphones and rise in the number of netizens across the globe. Furthermore, robo advisory services serve as convenient and widely used options for investors, as they provide instant affordability options to clients for investing into funds, which notably contributes toward [robo advisory market](#) growth.

The robo advisory market is segmented into business model, provider, service type, end user, and region. By business model, the robo advisory market is fragmented into pure robo advisors and hybrid robo advisors. By service provider, the market is divided into fintech robo advisors, banks, traditional wealth managers and others. By service type, the robo advisory market is categorized into direct plan-based/goal-based and comprehensive wealth advisory. By end user, the market is bifurcated into retail investor and high net worth individuals (HNIs). Region wise, the robo advisory market is analyzed across North America, Europe, [Asia-Pacific](#), and LAMEA.

According to the report, the global robo advisory industry garnered \$4.51 billion in 2019, and is projected to generate \$41.07 billion by 2027, manifesting a CAGR of 31.8% from 2020 to 2027.

Prime Determinants of Growth

Surge in adoption of advanced technologies, trend of digitization in financial institutions, and favorable government initiatives drive the growth of the global robo advisory market. However, security & compliance issues restrain the market growth. On the contrary, technological innovations and potential in developing countries are expected to provide new opportunities in the coming years.

Covid-19 Scenario:

Robo-advisors have been adopted extensively for wealth and assets management during the fluctuating conditions of the market taking place during the Covid-19 pandemic. These advisors assist in preventing investors from illogical and impulsive decision-making during times like these.

As robo advisors offers a huge exposure to individuals to gain expertise in diversification & management of the portfolio by investing in stocks, bonds, and certificate of deposit (CD), the need of these services gained traction to survive and sustain during the turbulent economic conditions.

The Hybrid Robo Advisors Segment to Retain Its Dominance By 2027

By business model, the hybrid robo-advisors segment accounted for the largest market share, contributing to nearly four-fifths of the global robo advisory market in 2019, and will continue its lead position during the forecast period. Moreover, this segment is expected to register the largest CAGR of 32.6% from 2020 to 2027. This is attributed to increase in international trades & investments and rise in requirements for customized portfolios for funds. The report also discusses the pure robo-advisors segment.

TheHNIs Segment to Maintain Its Dominance in Terms of Revenue By 2027

By end user, the HNIs segment contributed to the largest share in 2019, holding around two-thirds of the global robo advisory market, and is projected to maintain its dominance in terms of revenue by 2027. This is due to massive shift toward HNIs from traditional advisory services in developed and developing countries. However, the retail segment is expected to manifest at the fastest CAGR of 33.6% from 2020 to 2027, owing to increase in adoption of automated portfolio management across the globe.

North America to Maintain Its Leadership Status By 2027

By region, North America contributed to the highest market share in 2019, accounting for more than half of the global robo advisory market, and will maintain its leadership status by 2027. This is due to investments in mutual funds or ETFs made through robo advisor software. However, Asia-Pacific is expected to witness the highest CAGR of 34.8% during the forecast period, owing to key market players of the software establishing their presence in the emerging countries including China and India.
