

# Reusable Resuscitators Market Set to Surpass USD 1 Billion by 2031 | TMR Study

Increase in prevalence of asphyxia and R&D of reusable resuscitators

WILMINGTON, DELAWARE, UNITED STATES, October 26, 2023 /EINPresswire.com/ -- [Reusable Resuscitators Market](#) is expected to witness significant growth over the next decade. According to a recent report, the market was valued at USD 503.5 million in 2021 and is projected to expand at a compound annual growth rate of 6.4% from 2022 to 2031. This would bring the total market value to over USD 1.0 billion by the end of 2031.

Reusable Resuscitators Market

Increased R&D efforts to manufacture effective products drives reusable resuscitators market development. Reusable resuscitators are effective in respiratory failure or cardiac arrest treatment. They use a manually squeezed bag to provide air through a mask or airway tube. Reusable CPR resuscitators are cost-effective and efficient. These regulators offer successful resuscitation. Reusable resuscitators are usually made up of silicone or rubber. Manual, pediatric, self-inflating, and gas-powered resuscitators are used to resolving respiratory problems.

Increased investments by government and nonprofit organizations for the development of

pediatric medical devices have opened multiple growth avenues for the global reusable resuscitators industry. Key players are focusing on the development of products that can be used effectively to clean and disinfect in response to the COVID-19 outbreak, in an effort to lower the danger of cross-infection. Businesses are improving their production methods and utilizing premium raw materials to produce long-lasting products.

The global market was led by the without pop-off valves product type segment in 2021 owing to the emerging reusable resuscitators market trends of using these valves in several applications. These latex-free resuscitators aid in preventing allergic reactions. These benefits drive the demand for reusable resuscitators without pop-off valves.

The adult age group category held a significant market share in 2021. Adults are particularly vulnerable to lung infections, such as asthma. Adult reusable resuscitators are gaining traction owing to their pressing need in the healthcare sector.

North America is anticipated to have the highest global market share from 2022 to 2031. The high occurrence of sudden infant death syndrome (SIDS) in the region contributed to the growth of the regional market in 2021.

Asia Pacific held the second-largest market share in 2021. The market in the region is estimated to expand quickly between 2022 and 2031. Growth in the region is ascribed to rise in asphyxia awareness and a growth in government assistance for the management and treatment of respiratory disorders.
