

# Early Investors Can Reap Huge Rewards with Small Share Structure Company Now Ramping Up Sales and Production: \$IVDN

*Early Investors Can Reap Huge Rewards with Small Share Structure Company Now Ramping Up Sales and Production for the Multi-Billion Dollar Home Building Market*

PITTSBURGH, PENNSYLVANIA, UNITED STATES, October 27, 2023

[/EINPresswire.com/](http://EINPresswire.com/) -- Early Investors Can Reap Huge Rewards with Small Share Structure Company Now Ramping Up Sales and Production for the Multi-Billion Dollar Home Building Market [\\$IVDN](http://www.ivdn.com)

Very Small Stock Structure of Only 36 Million OS / 16 Million Float

For more information on this patented, quantum leap insulation manufacturer visit:

<http://www.insultexhousewrap.com> and <http://www.idigear.com>

□ Sole Maker of Patented Insultex® Insulation Delivering Energy Saving Performance Far Superior to All Competition.

□ Unique Evacuated Cell House Wrap Material Provides an Unmatched R-6 Rating Plus a Water Vapor, Air, and Wind Barrier and Other Superior Benefits.

**For the Rebuilding of Florida Choose:  
Unmatched R-6 Rated Insultex® House Wrap Insulation**

Patented Insultex® House Wrap is a quantum leap forward in insulation, as the thinnest, lightest and most energy-efficient housewrap insulation on the market today. No other Housewrap product can match the energy-saving performance of Insultex® House Wrap, now available for the New Construction and Remodeling of Residential Structures.

Evacuated, closed-cell structured insulation (Vacuum cells) is the best insulation with respect to R-value, and Insultex® House Wrap incorporates a countless number of evacuated closed cells. These individual cells stacked upon each other create a three-dimensional network of cell walls. It is this three-dimensional network of cell walls which dramatically impacts the conduction of thermal energy to deliver the most cost-efficient insulation option. The thermal energy travels in a three-dimensional tortuous path via the cell walls. As a result, based on the laws of physics, a significant R-value of the Insultex House Wrap is achieved, the homeowner can realize a new magnitude of energy savings with respect to heating and cooling for years to come.

**Two-dimensional representation of the thermal energy flow through the Insultex® House Wrap**

Contractors and builders who use Insultex House Wrap® have the ability to not only add a water vapor, air and wind barrier, but an additional R-6 insulation value to a structure. Builders who have to meet more stringent R-Value requirements can simply add Insultex House Wrap® to their wall structure and immediately add an additional R-6 insulation value.

- ▶ **R-Value Tested:** Extensive testing has been conducted by an independent certified laboratory using an accreditation agency-approved modified ASTM-C518 protocol. Other relevant thermal tests were conducted by accredited, independent materials testing laboratories in order to support the ASTM-C518 protocol.
- ▶ **Water & Air Resistant:** Protects the structure from water damage and wind intrusion.
- ▶ **Good Moisture Vapor Permeation Characteristics:** Protects the building from mold and mildew growth, which can cause wood rot damage and potential health issues.
- ▶ **UV Resistant:** Insultex House Wrap is not affected by the sun's UV rays.
- ▶ **Ease of Handling:** Easy to Handle, Trim and Install. Can be Fastened with Staples or Cap Nails.

IVDN Florida offer

**Insultex House Wrap®**  
House Wrap and Insulation Wrapped Into One

[LEARN MORE](#)  Watch Our Installation Video

IVDN Insultex House Wrap

□ Over a Dozen New Sales Accounts were Added in the Current Fiscal Quarter with Orders Being Fulfilled for Superior Insultex® House Wrap.

□ New Building Codes Require Higher Insulation Performance and IVDN Meets or Exceeds These New Standards Where Many Competitors Do Not.

□ eCommerce Section Added to the Company Website for Direct, online ordering.

□ Increased Order Fulfillment Capabilities Recently Added with Plans for Further Enhancement to Handle Increasing Customer Demand.

□ New Sales Accounts Include Large-Scale Commercial Modular Construction Firm Guerdon, LLC.

“

This is a key milestone and validation for our Insultex® insulation. Now that this patent is in place, we anticipate unprecedented growth in apparel and many other markets.”

*Innovative Designs CEO  
Joseph Riccelli*

□ Significant New Orders for Insultex House Wrap® from Repeat Customers.

□ Greater Energy Savings from Insultex® Insulation Delivers Substantial Economic Gains and Tax Credits for the User and Also Carbon Reduction for the Environment.

□ Insider Buying from Board Member with Lockheed Martin & NASA Background.

□ New US Patent Issued for Insultex® Manufacturing Process.

Innovative Designs, Inc. ([OTCQB: IVDN](#)), manufactures and markets its unique, patented Insultex® material, a quantum leap forward in insulation as the thinnest, lightest, and warmest insulator in the market today. IVDN products deliver optimum warmth and comfort with insulating, windproof, and waterproof protection with no animal materials used. IVDN has employed its proprietary Insultex® material to commercialize both clothing and home-building insulation products.

**We back up our claims  
with testing data**

Insultex House Wraps works. Here's the proof:

**See for yourself with our different  
verified testing data**

*For questions about our testing data, email us.*

- Tortuous Path**  
Insultex consists of a three-dimensional network of a countless number of evacuated cells, which impacts the conduction of thermal energy. [\[Read More\]](#)
- Testing Apparatus**  
The Testing Apparatus was manufactured to perform to an accreditation agency-approved modified ASTM-C518 protocol. [\[Read More\]](#)
- Evacuated Cells**  
The ultimate insulator is a vacuum - Insultex has incorporated proven vacuum technology. Insultex is made up of closed EVACUATED CELLS which makes it INSULATIVE. [\[Read More\]](#)
- R-6 Test Results**  
The R-6 Test Results were performed by an INDEPENDENT ACCREDITED LABORATORY that, through extensive testing, tested Insultex House Wrap for INSULATION VALUE. (R-Value)

**IVDN Testing**

Greater energy efficiency has never been more important in our history with the major driving factors of economic savings for the user as well as carbon reduction to help address the greenhouse gas climate crisis. Better insulation delivers real-world gains for both of these vital objectives and patented IVDN Insultex® Insulation is now the most energy-efficient insulation on the market by a wide margin.

This new evacuated cellular structured fabric, available exclusively from IVDN, is truly revolutionary. It has been proven that a vacuum is the best insulation and IVDN Insultex® incorporates countless evacuated cells. These individual cells create a tortuous path for thermal energy. Insultex® consists of a three-dimensional network of evacuated cells, which

impacts the conduction of thermal energy at a level unmatched by any competitive products. IVDN holds US patents on both the evacuated cell material and its manufacturing process.

### Multi-Billion Dollar Market

According to Grand View Research, the global insulation market size was estimated at USD \$52.18 billion in 2018 and is expected to expand at a CAGR of 5.7% going forward. Increasing consumer awareness regarding energy conservation is estimated to propel growth.

Contractors and builders who use IVDN Insultex House Wrap® have the ability to not only add a water vapor, air, and wind barrier but add an additional R-6 insulation to a structure. Builders who have to meet more stringent R-Value requirements can simply add IVDN Insultex House Wrap® to their wall structure and immediately add an additional R-6 insulation value.

Homeowners who upgrade to superior IVDN Insultex House Wrap® insulation may also qualify for substantial tax credits in addition to enjoying the lower energy bills that result. Installing superior IVDN Insultex House Wrap® is also very good for the planet as less energy consumption means less carbon production by energy suppliers. It's an ideal win-win for the homeowner and the environment.

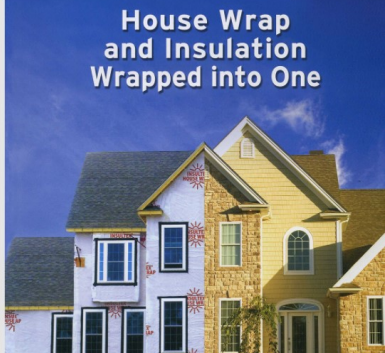

## About Insultex House Wrap

**INSULTEX HOUSE WRAP® IS WATER RESISTANT, AIR RESISTANT & UV RESISTANT**

Insultex House Wrap® is Water and Moisture-Resistant, Air and Wind-Resistant, and UV-Resistant. Insultex protects against water intrusion that could get behind the exterior cladding which in turn can cause mold, mildew and rotting. Insultex will increase comfort in a building structure by reducing drafts and increasing its efficiency. UV inhibitors are blended into the polymeric material to protect it from harmful ultraviolet degradation.

Insultex House Wrap® is a unique product, as it provides valuable enhancements to any structure. Insultex House Wrap® is comprised of two components. The first being the outer layer, which is a cross laminated polyolefin open mesh nonwoven. The second layer consists of the polymeric evacuated closed-cell structure. It offers the following benefits:

- ✓ High tear resistance.
- ✓ Increased burst strength.
- ✓ Breathability.
- ✓ Excellent Drainage properties.
- ✓ Low elongation.

### IVDN About

### IVDN IDI Gear

Long-time customer and home remodeler Lindus Construction strongly endorses and markets the IVDN Insultex™ House Wrap® product. See the Lindus website with their commentary here: <https://lindusconstruction.com/blog/insultex-house-wrap-future-home-weatherization/>.

For investors, IVDN has a very small share structure with only about 36 million shares outstanding and a public float of about 16 million shares. Additionally, according to the latest 10-K filing, CEO Joseph Riccelli and Company Directors are holding over 8 million of these shares making IVDN a very lean stock.

### Receiving Orders from Over a Dozen New Clients in the Current Fiscal Quarter

On October 26th IVDN announced that in the company's fiscal fourth quarter, it has gained over a dozen new client accounts for the patented, R-6-rated Insultex House Wrap®, with the product being shipped out to meet rising demand. New IVDN clients and other interested parties include some high market cap companies that are very important participants in the home building and remodeling industry.

One reason for the accelerating interest in IVDN Insultex House Wrap® appears to be related to new building codes going into effect across the US which require higher insulation performance standards. IVDN Insultex House Wrap® meets or exceeds these standards whereas many competitive products do not.

IVDN has recently updated the company's Insultex House Wrap® website. In response to rising customer interest, the website now includes a new e-commerce section where orders for the product may be placed directly online with the company. Pricing has been listed for different options. IVDN management reports that orders are already starting to be placed via the new eCommerce website option. Visit the new IVDN eCommerce option under the "Shop" tab at this direct link: <https://insultexhousewrap.com/shop/>.

IVDN CEO Joseph Riccelli said, "Word is starting to spread about the availability of Insultex House Wrap® which is the only insulated house wrap product on the market today. As more home builders and home remodelers learn of this game-changing advancement, they are coming to us with new orders in growing numbers. Because we have been working diligently over the past several months to ramp up our order fulfillment capability, Innovative Designs is ready to handle increasing order levels at this time with plans underway for even further manufacturing capacity enhancement. We project this unparalleled product to gain substantially more market share going forward."

### New IVDN Sales Accounts Added Including Guerdon LLC Large-Scale Commercial Modular Construction Firm with Projects in the US & Canada

On October 2nd IVDN announced that the company continues to add new sales accounts across the United States. Three of the most recent additions are as follows:

Guerdon, LLC is the leading manufacturer of large-scale, commercial modular construction projects in the Western US and Canada. With their factory and corporate office located in Boise, Idaho they serve 10 western states including California, Colorado, Idaho, Montana, Nevada, North Dakota, Oregon, Utah, Washington, and Wyoming as well as Canada. They are currently working on a project in Alaska.

The Guerdon team and facilities are equipped to handle a wide range of projects including Multi-family Modular Buildings, Modular Hotels & Hospitality facilities, Assisted Living & Senior Housing Centers, Student Housing Modular Buildings, Modular Workforce Housing or Man Camps, and more. Learn more about Guerdon at: <https://www.guerdonmodularbuildings.com/>.

Skehan Home Center, located in Ossipee, New Hampshire, is a family-owned business that has been in operation since 1985. Their Outside Sales Staff is a group of experienced professionals that make job site and office visits. Learn more about Skehan at: <https://skehanhomecenter.com/>.

Outside In Construction is located in Alton, New Hampshire. Outside In Construction is a family business that has been providing service for Laconia, NH, Wolfeboro, NH & the Lakes Region of New Hampshire for 23 years and is a Design and build specialized building and remodeling firm. Learn more about Outside in Construction at: <https://www.oiconstruction.com/>

IVDN CEO Joseph Riccelli commented "We welcome these new accounts along with all the others that have come onboard as either contractors, home builders or retailers. With this continued expansion, customers are now finding it easier to locate our products."

#### Significant New Orders for Insultex House Wrap® from Two Repeat Customers

On June 1st IVDN announced significant new orders for its Insultex House Wrap® from two separate customers in the Midwest region of the US. The Company is processing and shipping the orders immediately.

One order was from Lindus Construction in Wisconsin, which has been installing Insultex® House Wrap on their clients' homes for many years. Lindus Construction fully appreciates the unequaled energy saving and other benefits of the IVDN product which increases the value of the homes they work on. In all the years Lindus Construction has been installing Insultex House Wrap® there has never been even a single customer dissatisfied with its performance.

The second order was from a repeat customer in Minnesota which is a manufacturer of modular homes. This is another excellent application of Insultex House Wrap® for superior energy savings and other high-value benefits to enhance the long-term value of the homes where it is installed. Better insulation means lower energy bills, better home protection from the elements, and a

reduction in carbon output from energy suppliers for a better environment.

## Board Member Robert K. Adams Makes New \$100,000 Direct Investment in IVDN

On May 30th an SEC Form 4 filing was made, reporting that Company Board of Directors member Robert K. Adams had purchased 500,000 shares of IVDN common stock at the market price on that date of .20 per share. This transaction resulted in a cash payment to the Company of \$100,000 which will be used to help further current plans to expand production and marketing of the Insultex® insulation product line. With this 500,000 share purchase, Mr. Adams has added to his IVDN common stock holdings of 871,300 shares in total. The SEC filing with additional details may be viewed at this direct link:

<https://www.otcmarkets.com/filing/html?id=16696428&guid=OGT-kpYMRb9mB3h>

Regarding his IVDN personal investment, Robert K. Adams stated, "I see very high return potential in the Innovative Designs business plan going forward from this point. The Company's Insultex House Wrap®, IDI Gear clothing line and other products, made with our patented and unique evacuated cell material, offer far superior performance to all competitive options on the market today. Innovative Designs is the sole source of this incredible material which has been finally validated via the Federal Court victories recently won by the company. Now that we are in a position to focus all of our attention and energies on marketing the Insultex® product lines this is the time of opportunity we have been working towards and we intend to develop our market share to its fullest."

Robert K. Adams is a very accomplished member of the IVDN Board of Directors. Mr. Adams graduated from Texas A&I University with a degree in Electrical Engineering and he has worked in some impressive professional positions. He began his career at the Lockheed Martin Corporation working on projects for NASA. Mr. Adams then moved on to the Department of Defense as an electrical engineer at Kelly Air Force Base. Afterward, Mr. Adams was recruited to head a cyber security development team for the Department of Defense with direct work for the US Air Force. He later established his own private company to support clients through the investigation of technical and scientific research, government policies and procedures, patent development, and engineering concepts.

## IVDN Receives Patent Award for Propriety Insulation Manufacturing Process

On April 20th IVDN announced that the United States Patent and Trademark Office (USPTO) has issued Patent # 11,623.375 B2 defining the Company's proprietary process for forming closed and evacuated cell expanded low-density foam used to make the superior performance Insultex® insulation material. The USPTO first issued in January 2023 a Notice of Allowance and the final patent was issued accordingly.

It should be noted that the USPTO generally takes a very long period to issue patents, sometimes several years. However, in the case of the IVDN Insultex® and its propriety manufacturing

process, the patents were issued much quicker because there are simply no competitive products or technologies that have mastered the advancement of closed and evacuated cells for insulation. IVDN is the sole source in the world for this game-changing and now fully patent-protected advancement.

Innovative Designs CEO Joseph Riccelli commented, "This is a key milestone and validation for our Insultex® insulation. Now that this patent is in place, we anticipate unprecedented growth into apparel and many other markets."
